Volume 9393

Three-Dimensional Image Processing, Measurement (3DIPM), and Applications 2015, edited by Robert Sitnik, William Puech, Proc. of SPIE-IS&T Electronic Imaging, Vol. 9393, 939301 · © 2015 SPIE-IS&T
CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2191438

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publishers are not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 VIDEO, 3D, 4D, AND MULTIMODAL IMAGING SYSTEMS

- 9393 02 **Object matching in videos using rotational signal descriptor** [9393-1]
- 9393 03 **Depth propagation for semi-automatic 2D to 3D conversion** [9393-2]
- 9393 04 **Exploiting time-multiplexing structured light with picoprojectors** [9393-3]

SESSION 2 SECURITY AND COMPRESSION

- 9393 05 **Joint synchronization and high capacity data hiding for 3D meshes** [9393-4]
- 9393 06 **Digitized crime scene forensics: automated trace separation of toolmarks on high-resolution 2D/3D CLSM surface data** [9393-5]

SESSION 3 3D/4D IMAGING METROLOGY AND TECHNOLOGY

- 9393 08 **3D puzzle reconstruction for archeological fragments** [9393-7]
- 9393 09 **Stereo matching with space-constrained cost aggregation and segmentation-based disparity refinement** [9393-8]
- 9393 0A **A real-time 3D range image sensor based on a novel tip-tilt-piston micromirror and dual frequency phase shifting** [9393-9]
- 9393 0B **A no-reference stereoscopic quality metric** [9393-10]

SESSION 4 3D DATA PROCESSING AND IMAGING TECHNOLOGY

- 9393 0C **Coarse to fine: toward an intelligent 3D acquisition system** [9393-11]
- 9393 0D **Mesh saliency with adaptive local patches** [9393-12]
- 9393 0E **Phase-aware-candidate-selection for time-of-flight depth map denoising** [9393-13]
- 9393 0F **Camera model compensation for image integration of time-of-flight depth video and color video** [9393-14]

SESSION 5 STEREO AND MULTI-VIEW RECONSTRUCTION

- 9393 0G **A practical implementation of free viewpoint video system for soccer games** [9393-15]
- 9393 0H **Observing atmospheric clouds through stereo reconstruction** [9393-16]
- 9393 0I **Robust stereo matching based on probabilistic Laplacian propagation with weighted mutual information** [9393-17]
- 9393 0J **Structure-aware depth super-resolution using Gaussian mixture model** [9393-18]
- 9393 0K **A new fast matching method for adaptive compression of stereoscopic images** [9393-19]

INTERACTIVE PAPER SESSION

- 9393 0L **Crosstalk characterization of PMD pixels using the spatial response function at subpixel level** [9393-20]
- 9393 0M **Unified crosstalk measurement method for various distances on autostereoscopic multi-view displays** [9393-21]
- 9393 0P **About using Pockels cell for time-of-flight imaging** [9393-24]
- 9393 0Q **Towards automated firearm identification based on high resolution 3D data: rotation-invariant features for multiple line-profile-measurement of firing pin shapes** [9393-25]
- 9393 0R **Continuous section extraction and over-underbreak detection of tunnel based on 3D laser technology and image analysis** [9393-26]
- 9393 0S **Efficient edge-awareness propagation via single-map filtering for edge-preserving stereo matching** [9393-27]
- 9393 0T **Disparity fusion using depth and stereo cameras for accurate stereo correspondence** [9393-28]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Sheila S. Hemami, Northeastern University (United States)

Symposium Co-chair

Choon-Woo Kim, Inha University (Korea, Republic of)

Conference Chairs

Robert Sitnik, Warsaw University of Technology (Poland)

William Puech, Laboratoire d'Informatique de Robotique et de
Microelectronique de Montpellier (France)

Conference Program Committee

Atila M. Baskurt, Université de Lyon (France)

Hugues Benoit-Cattin, Institut National des Sciences Appliquées de
Lyon (France)

Silvia Biasotti, Consiglio Nazionale delle Ricerche (Italy)

Adrian G. Bors, The University of York (United Kingdom)

Saida Bouakaz, Université Claude Bernard Lyon 1 (France)

Benjamin Bustos, Universidad de Chile (Chile)

Eduardo da Silva, UFRJ (Brazil)

Mohamed Daoudi, Télécom Lille 1 (France)

Florent Dupont, Université Claude Bernard Lyon 1 (France)

Gilles Gesquière, Laboratoire des Sciences de l'Information et des
Systèmes (France)

Afzal Godil, National Institute of Standards and Technology
(United States)

Serge Miguet, Université Lumière Lyon 2 (France)

Eric Paquet, National Research Council Canada (Canada)

Tobias Schreck, Universität Konstanz (Germany)

Frédéric Truchetet, Université de Bourgogne (France)

Stefano Tubaro, Politecnico di Milano (Italy)
