Volume 9975

Proceedings of SPIE 0277-786X, V. 9975

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing and Modeling of Ecosystems for Sustainability XIII, edited by Wei Gao, Ni-Bin Chang, Proc. of SPIE Vol. 9975, 997501 · © 2016 SPIE · CCC code: 0277-786X/16/$18 · doi: 10.1117/12.2260587

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 REMOTE SENSING FOR AGRICULTURE, ECOSYSTEMS, AND HYDROLOGY

9975 02 **Using MODIS weekly evapotranspiration to monitor drought** [9975-1]

9975 03 **Modeling forest defoliation using simulated BRDF and assessing its effect on reflectance and sensor reaching radiance** [9975-2]

9975 04 **Probing insect backscatter cross-section and melanization using kHz optical remote detection system** [9975-3]

9975 07 **Impact of land cover change on the environmental hydrology characteristics in Kelantan river basin, Malaysia** [9975-6]

9975 08 **Using remote sensing satellite data and artificial neural network for prediction of potato yield in Bangladesh** [9975-7]

SESSION 2 REMOTE SENSING, MODELING APPLICATIONS AND GIS

9975 0A **Study of variations in soil water potential with the incorporation of charcoal and carbon nanotubes through infrared thermal images (Invited Paper)** [9975-9]

9975 0B **Analysis of ten years of surface UV observations from data fusion for the continental U.S. (Invited Paper)** [9975-10]

9975 0C **Application of vegetation isoline equations for simultaneous retrieval of leaf area index and leaf chlorophyll content using reflectance of red edge band** [9975-11]

9975 0D **Soil isoline equation for the range of visible to shortwave infrared in a context of hyperspectral data analysis** [9975-12]

9975 0E **In-situ calibration of the water vapor channel for multi-filter rotating shadowband radiometer using collocated GPS, AERONET and meteorology data** [9975-13]

9975 0F **GIMS-technology for environmental monitoring** [9975-14]

9975 0G **Monitoring the changes of water storage over the Huang-huai-hai plain based on the GRACE satellite** [9975-29]

POSTER SESSION

9975 0H **Identification of *Phragmites australis* and *Spartina alterniflora* in the Yangtze estuary between Bayes and BP neural network using hyper-spectral data** [9975-15]

9975 0J **The study method of estimation tidal flat with remote sensing waterlines** [9975-17]

9975 0K **Snow cover identification of saline-alkali land in the Western Jilin province of China based on MWRI data** [9975-18]

9975 0L **Remote sensing monitoring of green tide in the Yellow Sea in 2015 based on GF-1 WFV data** [9975-19]

9975 0M **Study on the extraction method of tidal flat area in northern Jiangsu Province based on remote sensing waterlines** [9975-20]

9975 0N **Nonlinear vegetation phenology shifts over northern China during 1982-2006** [9975-21]

9975 0O **Green tide disaster monitoring system based on multi-source data** [9975-22]

9975 0P **Error analysis on green tide monitoring using MODIS data in the Yellow Sea based on GF-1 WFV data** [9975-23]

9975 0Q **Assessment of spectral characteristics of rodents in conditions of effect of heavy metals** [9975-24]

9975 0R **Implementation of data management and analysis system for marine ranching** [9975-25]

9975 0S **An integrated image processing platform designed for Chinese GF-1 wide field view data** [9975-26]

9975 0T **Experimental studies of influence of oil hydrocarbons on plants' optical characteristics** [9975-27]

9975 0U **Effects of microphysics parameterization schemes on the simulation of a heavy rainfall event in Shanghai** [9975-28]

9975 0W **Evaluation of the consistency of OMI-TOMS total ozone with collocated ground-based measurements** [9975-32]

9975 0X **Estimation of chlorophyll content of *Phragmites australis* based on PROSPECT and DART models in the saltmarsh of Yangtze Estuary** [9975-33]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chairs

Wei Gao, Colorado State University (United States)
Ni-Bin Chang, University of Central Florida (United States)

Conference Co-chair

Jinnian Wang, Institute of Remote Sensing Applications (China)

Conference Program Committee

May Chui, The University of Hong Kong (Hong Kong, China)
E. Raymond Hunt Jr., Agricultural Research Service (United States)
Brian Robert Johnson, National Snow and Ice Data Center (United States)
Thomas U. Kampe, NEON, Inc. (United States)
Xin-Zhong Liang, University of Maryland, College Park (United States)
Dennis Ojima, Colorado State University (United States)
David Riaño, University of California, Davis (United States)
Runhe Shi, East China Normal University (China)
Jiong Shu, East China Normal University (China)
Zhibin Sun, Colorado State University (United States)
Hongjie Xie, The University of Texas at San Antonio (United States)
Xiaobing Zhou, Montana Tech (United States)

Session Chairs

1 Remote Sensing for Agriculture, Ecosystems, and Hydrology
Zhibin Sun, Colorado State University (United States)
Qiaozhen Mu, Science Systems and Applications, Inc. (United States)

2 Remote Sensing, Modeling Applications and GIS
Ni-Bin Chang, University of Central Florida (United States)
Carlos Villaseñor-Mora, Universidad de Guanajuato (Mexico)
