SPIE

Volume 11679

Proceedings of SPIE 0277-786X, V. 11679

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High-Power Laser Materials Processing: Applications, Diagnostics, and Systems X, edited by Stefan Kaierle, Stefan W. Heinemann, Proc. of SPIE Vol. 11679, 1167901 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596563

Proc. of SPIE Vol. 11679 1167901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems X*, edited by Stefan Kaierte, Stefan W. Heinemann, Proceedings of SPIE Vol. 11679 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PROCESS CONTROL

- 11679 08 **Depth monitoring system during laser processing using KTN-based wavelength-swept light source of 1.3- μ m wavelength band [11679-5]**

WELDING

- 11679 09 **Laser beam welding with mobile vacuum: MoVac [11679-6]**

CUTTING AND DRILLING

- 11679 0C **Cutting and drilling of CFRP by using 3-kW CW single-mode fiber laser and galvanometer scanner [11679-9]**
- 11679 0E **Development of an on-the-fly percussion drilling process based on pulse bursts [11679-11]**

SURFACE TREATMENT

- 11679 0H **Development of high-power laser ablation process for polycrystalline diamond polishing: part 3. processing with an ultra-short-pulsed laser up to 1kW [11679-14]**
- 11679 0J **Application of nanoindentation technique to test surface hardness and residual stress of NiTi alloy after femtosecond laser shock peening [11679-20]**

OPTICAL SYSTEMS

- 11679 0L **Thermal lensing mitigation for high power laser processing [11679-17]**
