Volume 11621

Proceedings of SPIE, 1605-7422, V. 11621

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Diagnostic and Therapeutic Applications of Light in Cardiology 2021, edited by
Laura Marcu, Gijs van Soest, Proc. of SPIE Vol. 11621, 1162101 · © 2021 SPIE
CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2596753

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Diagnostic and Therapeutic Applications of Light in Cardiology 2021*, edited by Laura Marcu, Gijs van Soest, Proc. of SPIE 11621, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NONINVASIVE AND THERAPEUTIC TECHNOLOGIES

- 11621 08 **Sealing and bisection of blood vessels using a 1470 nm laser: optical, thermal, and tissue damage simulations** [11621-6]
- 11621 09 **Respiratory phase detection from optical phonocardiography characteristics** [11621-7]
- 11621 0A **Optimization of multi-beam silicon photonics-based laser Doppler vibrometry for measuring cardiovascular signals on bare skin** [11621-8]

OCT

- 11621 0G **Intra-operative vascular monitoring during balloon angioplasty by vascular wall backscattering light measurement** [11621-14]

SPECTROSCOPY AND TISSUE CHARACTERIZATION

- 11621 0J **Accuracy of catheter-based near-infrared auto-fluorescence detection in human coronary plaques** [11621-17]

POSTER SESSION

- 11621 0T **Ultrafast axial-scanning multifocus photoacoustic microscope with extended depth-of-field based on a tunable acoustic gradient lens and fiber delay network** [11621-27]
