Volume 11962

Proceedings of SPIE, 1605-7422, V. 11962

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Elastography and Tissue Biomechanics VIV, edited by Kirill V. Larin, Giuliano Scarcelli
Proc. of SPIE Vol. 11962, 1196201 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2635659

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Elastography and Tissue Biomechanics VIV*, edited by Kirill V. Larin, Giuliano Scarcelli, Proc. of SPIE 11962, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TISSUE MECHANICS I

11962 02 **Investigating scleral crosslinking to stop myopia progression using optical coherence elastography [11962-9]**

OCE

11962 03 **Why apparent contrast in elasticity of biological tissues is noticeably different for compression ultrasound elastography and OCE [11962-19]**

11962 04 **Two-dimensional (2D) harmonic oscillation optical coherence elastography [11962-21]**

NOVEL METHODS

11962 05 **Hydraulic force spectroscopy: an interferometry-based approach to micropipette aspiration for mechanobiology studies at the nanoscale [11962-31]**

POSTER SESSION

11962 06 **Possibilities of Brillouin spectroscopy in the study of xenogeneic collagen-containing materials [11962-41]**

11962 07 **Age-related viscoelasticity changes in rabbit lens measured by optical coherence elastography [11962-44]**

11962 08 **Assessment of the influence of lens capsule on lens biomechanical properties with optical coherence elastography [11962-47]**

Conference Committee

Symposium Chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

E. Duco Jansen, Vanderbilt University (United States)
Jessica C. Ramella-Roman, Florida International University (United States)

Conference Chairs

Kirill V. Larin, University of Houston (United States)
Giuliano Scarcelli, University of Maryland, College Park (United States)

Conference Program Committee

Steven G. Adie, Cornell University (United States)
Stefan Catheline, Institut National de la Santé et de la Recherche Médicale (France)
Zhongping Chen, Beckman Laser Institute and Medical Clinic (United States)
Jürgen W. Czarske, TU Dresden (Germany)
Kishan Dholakia, University of St. Andrews (United Kingdom)
Jochen R. Guck, TU Dresden (Germany)
Christine P. Hendon, Columbia University (United States)
Brendan F. Kennedy, The University of Western Australia (Australia)
Sean J. Kirkpatrick, Michigan Technological University (United States)
Susana Marcos, Instituto de Óptica "Daza de Valdés" (Spain)
Seemantini K. Nadkarni, Wellman Center for Photomedicine (United States)
Matthew O'Donnell, University of Washington (United States)
Amy L. Oldenburg, The University of North Carolina at Chapel Hill (United States)
Ivan M. Pelivanov, University of Washington (United States)
Cynthia J. Roberts, The Ohio State University (United States)
Jannick P. Rolland, University of Rochester (United States)
David D. Sampson, University of Surrey (United Kingdom)
Ian A. Sigal, University of Pittsburgh (United States)
Peter T. C. So, Massachusetts Institute of Technology (United States)
Kandice Tanner, National Cancer Institute (United States)
Peter Török, Imperial College London (United Kingdom)
Tianshi Wang, Erasmus MC (Netherlands)

Vladislav V. Yakovlev, Texas A&M University (United States)
Seok Hyun A. Yun, Wellman Center for Photomedicine (United States)
Vladimir Y. Zaitsev, Institute of Applied Physics of the RAS
(Russian Federation)
Qifa Zhou, The University of Southern California (United States)
