*Published by*  
SPIE

**Volume 12488**

Proceedings of SPIE 0277-786X, V. 12488

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Health Monitoring of Structural and Biological Systems XVII, edited by  
Paul Fromme, Zhongqing Su, Proc. of SPIE Vol. 12488, 1248801  
© 2023 SPIE · 0277-786X · doi: 10.1117/12.2684107

Proc. of SPIE Vol. 12488 1248801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Health Monitoring of Structural and Biological Systems XVII*, edited by Paul Fromme, Zhongqing Su, Proc. of SPIE 12488, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## GUIDED WAVES FOR SHM AND NDE I

---

- 12488 03 **On detecting regional inhomogeneity in composite plates using Lamb waves** [12488-1]
- 12488 04 **Guided wave energy focusing and steering in composite laminates** [12488-2]
- 12488 05 **Study of guided wave propagation in multi-layer waveguides for the inspection of additively manufactured components** [12488-4]
- 12488 06 **Damage localization in composite panel using contact and non-contact elastic wave generation** [12488-5]
- 12488 07 **Changes in the state of ice buildup on a composite plate: ultrasonic monitoring and assessment** [12488-6]

---

## GUIDED WAVES FOR SHM AND NDE II

---

- 12488 0A **Effect of axial stresses on longitudinal guided waves in pipe structures** [12488-10]
- 12488 0D **Investigation of mode conversion of SH waves at the welded tabular ends of a fuel storage tank** [12488-82]

---

## GUIDED WAVES FOR SHM AND NDE III

---

- 12488 0E **Comparative study of elastic wave sensing using piezoceramic and fiber optic FBG sensors** [12488-13]
- 12488 0F **Modeling of ultrasonic coupling between optical fibers through an adhesive bond for sensing applications** [12488-14]
- 12488 0G **Through thickness inspection in various structures using ultrasonic wave coupling in an embedded fiber optical sensor** [12488-15]
- 12488 0H **On the symmetric damage detection with flexural waves using circular piezoelectric transducers** [12488-16]
- 12488 0I **Promoting local resonances in waveguide structures using the electromechanical impedance method** [12488-17]

---

#### RECENT ADVANCES IN NONLINEAR ULTRASONICS-BASED NDE AND SHM

---

- 12488 OL **Nonlinear ultrasonic analysis inspired by phase-based motion magnification** [12488-20]
- 12488 OM **Structural damage detection based on nonlinear vibro-acoustic modulations observed in shear horizontal wave propagation** [12488-21]
- 12488 ON **Nonlinear crack-wave interaction in shear horizontal wave propagation: numerical modelling of local elastic and dissipative effects** [12488-23]
- 12488 OO **Acoustic source localization in composite plates using non-linear ultrasonic technique: SPC-I** [12488-24]

---

#### SHM AND NDE OF AEROSPACE AND COMPOSITE STRUCTURES

---

- 12488 OQ **Multi-method structural health monitoring concept for pinned hybrid joints** [12488-27]
- 12488 OS **Detection of moisture-related damage in GFRP composites using hyperspectral imaging** [12488-31]
- 12488 OT **Transfer function models and sensitivity analysis** [12488-32]
- 12488 OU **Improvements for out-of-plane-loaded hybrid joints regarding mechanical strength and SHM applicability** [12488-91]

---

#### 3D-PRINTED SENSORS FOR SHM AND ADDITIVE MANUFACTURING

---

- 12488 OV **Multiscale multiphase 3D printing of photonic devices and sensors for system health monitoring** [12488-33]
- 12488 OW **Numerical modeling of thermal effects on the mechanical behavior of additive manufactured carbon fiber reinforced polymer** [12488-35]
- 12488 OX **A machine-learning-based health diagnosis of polymer 3D-printed plates using the electromechanical impedance method** [12488-36]
- 12488 OY **Sub-zero temperature influence on the durability of additive manufactured composite with embedded fiber Bragg grating sensors** [12488-37]

---

#### OPTICAL SENSING AND MACHINE LEARNING FOR SHM AND NDE

---

- 12488 12 **Application of mask RCNN for localizing and quantifying areas of energy leak in buildings using infrared images** [12488-44]

- 12488 13 **Computer vision-based vehicle weigh-in-motion system** [12488-45]
- 12488 14 **Liquid limit estimation of Kaolin clay using video-based vibration measurements** [12488-46]
- 12488 15 **Structural displacement estimation using high-sampling acceleration and temporally aliased low-sampling vision measurements** [12488-47]
- 12488 16 **On the computer vision-based approach for output-only wave-based structural identification and health monitoring** [12488-48]
- 12488 17 **Sensor-aided camera calibration for three dimensional digital image correlation measurements (Best Student Paper Award)** [12488-77]
- 12488 18 **High-speed polarization imaging for failure detection in fiber spinning** [12488-78]

---

#### ARTIFICIAL INTELLIGENCE (AI) DRIVEN SHM

---

- 12488 19 **Vibration-based SHM/NDE of continuous welded rails** [12488-62]
- 12488 1A **A deep learning approach for the inverse shape design of 2D acoustic scatterers** [12488-49]
- 12488 1B **Helical paths-based two-dimensional source discrimination of acoustic emission waveforms from hollow cylindrical structures using variational autoencoder** [12488-50]
- 12488 1C **Time-inferred autoencoder for learning and adapting to changes in a dynamic system in the presence of noise** [12488-51]
- 12488 1D **Deep learning algorithms for delaminations identification on composite panels by wave propagation signal analysis** [12488-52]

---

#### SHM FOR MEDICAL AND BIOMEDICAL APPLICATIONS

---

- 12488 1E **Lung nodule biopsy guided using a 30 MHz ultrasound transducer: in vitro study** [12488-54]
- 12488 1G **Non-invasive respiratory rate detection using thermal imaging and facial recognition** [12488-56]
- 12488 1J **Smart and secure medical device gateway for managing patient recovery** [12488-59]

---

#### CIVIL INFRASTRUCTURE MONITORING

---

- 12488 1K **Statistical study on bridge vibration responses using distributed acoustic sensing** [12488-60]

- 12488 1L **Anomaly identification algorithms for indirect structural health monitoring using a laboratory-scale railroad track system** [12488-61]
- 12488 1N **Ultrasonic-based defect identification in concrete using uniform manifold approximation and projection (UMAP)** [12488-64]
- 12488 1O **Statistical analysis and correlation of small punch test** [12488-65]

---

#### ROBOTIC AND AUTONOMOUS NDE

---

- 12488 1P **Automated nondestructive testing of composites using air-coupled guided ultrasound** [12488-66]
- 12488 1Q **A model-based technique for fault identification of sensors in autonomous systems using adaptive neural networks and extended Kalman filtering** [12488-67]
- 12488 1R **An innovative method and apparatus for speed control of pipe health monitoring robot during gas pipeline inspection** [12488-69]

---

#### SENSORS AND SIGNAL PROCESSING FOR SHM

---

- 12488 1S **Experimental investigation of local defect resonance for damage identification** [12488-70]
- 12488 1T **Adaptive unsaturated stochastic resonance in parallel array and its application to acoustic emission signals** [12488-72]
- 12488 1U **Investigating the use of polarization maintaining FBG sensors for GW-based SHM** [12488-74]

---

#### POSTER SESSION

---

- 12488 21 **Mode-converted Lamb wave sensitivity prediction for part-thickness crack-like defects** [12488-83]
- 12488 25 **Guided ultrasonic wave monitoring techniques to assess bone implant loosening** [12488-87]
- 12488 26 **Investigating the effect of material on the coupling of guided wave in the optical fiber** [12488-88]

# Conference Committee

## *Symposium Chairs*

**Anastasia Muliana**, Texas A&M University (United States)  
**Wiesław M. Ostachowicz**, The Szwedalski Institute of Fluid-Flow  
Machinery (Poland)

## *Symposium Co-chairs*

**Haiying Huang**, The University of Texas at Arlington (United States)  
**Hani E. Naguib**, University of Toronto (Canada)

## *Conference Chair*

**Paul Fromme**, University College London (United Kingdom)

## *Conference Co-chair*

**Zhongqing Su**, The Hong Kong Polytechnic University  
(Hong Kong, China)

## *Conference Program Committee*

**Sourav Banerjee**, University of South Carolina (United States)  
**Yoseph Bar-Cohen**, Jet Propulsion Laboratory (United States)  
**Fu-Kuo Chang**, Stanford University (United States)  
**Anthony J. Croxford**, University of Bristol (United Kingdom)  
**Hadi Fekrmandi**, Alumni, Mechanical and Materials Engineering,  
Florida International University (United States)  
**Victor Giurgiutiu**, University of South Carolina (United States)  
**Srinivasan Gopalakrishnan**, Indian Institute of Science (India)  
**Guoliang Huang**, University of Missouri (United States)  
**Robin James**, General Motors Company (United States)  
**Xiaoning Jiang**, North Carolina State University (United States)  
**Ajay M. Koshti**, NASA Johnson Space Center (United States)  
**Sridhar Krishnaswamy**, Northwestern University (United States)  
**Tribikram Kundu**, The University of Arizona (United States)  
**Francesco Lanza di Scalea**, University of California, San Diego  
(United States)  
**Zhu Mao**, Worcester Polytechnic Institute (United States)  
**Ernesto Monaco**, Università degli Studi di Napoli Federico II (Italy)  
**Christopher Niezrecki**, University of Massachusetts Lowell  
(United States)  
**Mostafa A. Nouh**, University at Buffalo (United States)

**Wieslaw M. Ostachowicz**, The Szewalski Institute of Fluid-Flow Machinery (Poland)  
**Xinlin Qing**, Xiamen University (China)  
**Henrique L. Reis**, University of Illinois at Urbana-Champaign (United States)  
**Fabrizio Ricci**, Università degli Studi di Napoli Federico II (Italy)  
**Piervincenzo Rizzo**, University of Pittsburgh (United States)  
**Alessandro Sabato**, University of Massachusetts Lowell (United States)  
**Christoph Schaal**, California State University, Northridge (United States)  
**Fabio Semperlotti**, Purdue University (United States)  
**Yanfeng Shen**, Shanghai Jiao Tong University (China)  
**Hoon Sohn**, Korea Advanced Institute of Science & Technology (Korea, Republic of)  
**Wieslaw J. Staszewski**, AGH University of Science and Technology (Poland)  
**Tadeusz Stepinski**, AGH University of Science and Technology (Poland)  
**Tadeusz Uhl**, AGH University of Science and Technology (Poland)  
**Wei-Chih Wang**, University of Washington (United States)  
**Yue-Sheng Wang**, Beijing Jiaotong University (China)  
**Jinkyu Yang**, University of Washington (United States)  
**Lingyu Yu**, University of South Carolina (United States)  
**Andrei N. Zagrai**, New Mexico Institute of Mining and Technology (United States)
