SPIE

Volume 12671

Proceedings of SPIE 0277-786X, V. 12671

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advances in Solar Energy: Heliostat Systems Design, Implementation, and Operation,
edited by Guangdong Zhu, Marc Röger, Zhifeng Wang, Proc. of SPIE Vol. 12671,
1267101 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.3012712

Proc. of SPIE Vol. 12671 1267101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advances in Solar Energy: Heliostat Systems Design, Implementation, and Operation*, edited by Guangdong Zhu, Marc Röger, Zhifeng Wang, Proc. of SPIE 12671, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

HELIOSTAT METROLOGY

- 12671 02 **Opportunities for metrology in solar thermal heliostat applications (Invited Paper)** [12671-1]
- 12671 03 **Novel scanner-based methodology for a fast and complete high quality characterization of all solar field heliostats, their facets, and corresponding reflected beams** [12671-3]
- 12671 04 **Grating-embedded mirrors for heliostat tracking error metrology** [12671-4]
- 12671 05 **Tools for solar heliostat metrology adapted from the durable goods industry** [12671-5]

HELIOSTAT FIELDS

- 12671 06 **Guidelines for heliostat testing (Invited Paper)** [12671-6]
- 12671 07 **Spectrally-resolved solar radiation attenuation long-term monitoring results in a commercial central-receiver CSP plant** [12671-7]
- 12671 08 **Towards deep learning based airborne monitoring methods for heliostats in solar tower power plants** [12671-8]
- 12671 09 **Operational experiences with the heliostat field at the Juelich solar towers** [12671-9]

METROLOGY IN HELIOSTAT MANUFACTURING

- 12671 0A **Simultaneous alignment of heliostat mirrors, using retro-reflectors** [12671-12]

HELIOSTAT CALIBRATION

- 12671 0B **Scalable heliostat calibration system (SHORT): design, validation, and implementation analysis (Invited Paper)** [12671-20]
- 12671 0C **Data set sampling and its implications on the heliostat calibration** [12671-21]

POSTER SESSION

- 12671 0D **Shape-adjustable heliostats: designs for individuals and fields for > 3000 concentration**
[12671-31]
- 12671 0E **Shrinkage study and optimization of multiplexed green holographic solar concentrators toward improved photovoltaic energy** [12671-33]
- 12671 0F **Design considerations for leaf-inspired luminescent solar concentrators based on two-stage photoconversion** [12671-35]
- 12671 0G **Design and fabrication of a linear Fresnel-type reflector for solar concentration based on caustic surfaces by reflection** [12671-36]
- 12671 0H **Hartmann-type hybrid null screens for testing a fast plano-convex aspherical condenser**
[12671-37]

Conference Committee

Conference Chairs

Guangdong Zhu, National Renewable Energy Laboratory
(United States)

Marc Röger, German Aerospace Center (DLR) (Germany)

Zhifeng Wang, Institute of Electrical Engineering, Chinese Academy
of Sciences (China)

Conference Co-chair

Ali M. Khounsary, Illinois Institute of Technology (United States)

Program Track Chair

José Sasián, Wyant College of Optical Sciences (United States)

Conference Program Committee

Andru J. Prescod, ManTech International Corporation (United States)
and U.S. Dept. of Energy (United States)

David Haas, U.S. Dept. of Energy (United States)

Roger Angel, Steward Observatory (United States)

Paul François Ndione, National Renewable Energy Laboratory
(United States)

Daewook Kim, Wyant College of Optical Sciences (United States)

Kevin G. Harding, Optical Metrology Solutions LLC (United States)
