Proceedings of SPIE 0277-786X, V. 13199

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Target and Background Signatures X: Traditional Methods and Artificial Intelligence,
edited by Karin Stein, Ric Schleijsen, Proc. of SPIE Vol. 13199, 1319901
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3054793

Proc. of SPIE Vol. 13199 1319901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Target and Background Signatures X: Traditional Methods and Artificial Intelligence*, edited by Karin Stein, Ric Schleijsen, Proc. of SPIE 13199, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

AI COUNTERING CAMOUFLAGE AND VICE VERSA

13199 04 **VSAI: visible signature reduction with camouflage patterns via generative AI algorithm (Invited Paper)** [13199-3]

DETECTION, RECOGNITION, IDENTIFICATION

13199 05 **Parametric point spread function estimation for thermal imaging systems using easy-to-manufacture random pattern targets** [13199-5]

SCENE AND SIGNATURE SIMULATION

13199 08 **Physics-based synthetic imagery generation of near-surface geo-environments** [13199-8]

13199 09 **Physics-based infrared high elevation engagement modelling of naval platforms** [13199-9]

13199 0A **Sensitivity study on the EO/IR signature of orbiting satellites using MuSES** [13199-10]

13199 0B **Temporary tank emplacements in SAR images of new space satellites: a signature analysis** [13199-11]

13199 0C **Multiresolution components fused evaluation for hyperspectral atmospheric radiative transfer model using feature selective validation** [13199-12]

TESTING AND VALIDATION

13199 0D **COURAGEOUS: test methods for counter-UAS systems (Invited Paper)** [13199-13]

13199 0E **Complex permittivity measurement procedure of adobe and utilization of matched illumination waveforms in through-the-wall radar imaging** [13199-14]

Conference Committee

Symposium Chair

Ric Schleijpen, TNO Defence, Security and Safety (Netherlands)

Symposium Co-chairs

Chantal Andraud, Ecole Normale Supérieure de Lyon (France)

Robert A. Lamb, Leonardo MW Ltd. (United Kingdom)

Conference Chairs

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Ric Schleijpen, TNO Defence, Security and Safety (Netherlands)

Conference Programme Committee

Jean Dumas, Defence Research and Development Canada, Valcartier (Canada)

Maarten A. Hogervorst, TNO (Netherlands)

Hans M. Kariis, Swedish Defence Research Agency (Sweden)

Louisa Laing, QinetiQ Ltd. (United Kingdom)

Daniel W. O'Hagan, Fraunhofer Institute for High Frequency Physics and Radar Techniques FHR (Germany)

Eveline Örtenberg, FOI-Swedish Defence Research Agency (Sweden)

Alexander Schwarz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Gorm K. Selj, Norwegian Defence Research Establishment (Norway)

Henny E. T. Veerman, TNO (Netherlands)

Peter Wellig, Armasuisse (Switzerland)
