PROCEEDINGS OF SPIE

International Workshop on Automation, Control, and Communication Engineering (IWACCE 2024)

Weihua Mou
Editor

19–21 August 2024
Hohhot, China

Organized by
Association for Science and Engineering (China)

Published by
SPIE

Volume 13394

Proceedings of SPIE 0277-786X, V. 13394

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Workshop on Automation, Control, and Communication Engineering (IWACCE 2024),
edited by Weihua Mou, Proc. of SPIE Vol. 13394, 1339401
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3055292

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Workshop on Automation, Control, and Communication Engineering (IWACCE 2024)*, edited by Weihua Mou, Proc. of SPIE 13394, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

COMMUNICATION ENGINEERING

13394 02 **Research on application of Beidou dual-mode receiver** [13394-7]

13394 03 **Research on plasma antenna based on inductively coupled feeding structure** [13394-20]

13394 04 **Impact of orbit determination methods on the characteristics of LEO satellites clock bias** [13394-28]

13394 05 **Optimization scheme of active reconfigurable intelligent surface assisted Internet of Vehicles system** [13394-39]

13394 06 **Design of multi-network and multi-mode relay terminal station for satellite communication** [13394-43]

13394 07 **Implementing MU-MIMO in power line communication: introducing NS-MUIR algorithm for efficient interference reduction** [13394-67]

13394 08 **A reverse link signal receiving method for L-band digital aviation communication system (L-DACS1)** [13394-72]

13394 09 **Human brain information encryption** [13394-73]

13394 0A **Time-domain distributed multichannel Wiener filtering speech enhancement algorithm** [13394-78]

13394 0B **Analysis of the influence of power frequency electromagnetic field in substation on 5G base station deployment** [13394-87]

13394 0C **Research on feature space migration fault diagnosis for missing data signals** [13394-90]

13394 0D **A case study of the application of IoT technology in the manufacturing industry** [13394-91]

13394 0E **A noise removal algorithm for photon counting LiDAR data: the ConvDS model** [13394-92]

13394 0F **Intelligent channel emulator design based on signal power adaptive linking optimisation** [13394-98]

INTELLIGENT INFORMATION PROCESSING

13394 0G **Image dehazing algorithm based on airport image quality evaluation** [13394-10]

13394 0H **Research on quality management strategy of automotive software based on agile iteration** [13394-16]

13394 0I **The method of remote debugged based on FPGA SelectMap mode** [13394-17]

13394 0J **Data security governance in big data industry mechanism logic and order construction** [13394-18]

13394 0K **Micro-Doppler spectrums recognition of aerial targets based on convolutional neural networks** [13394-23]

13394 0L **Modeling of heavy-duty gas turbine based on machine learning algorithms** [13394-25]

13394 0M **Research on secondary frequency standards control algorithm based on linear quadratic regulator** [13394-26]

13394 0N **Optimal quaternary [*n*,4] Hermitian self-orthogonal codes** [13394-27]

13394 0O **Ethical governance pattern of big data technology based on intelligent information processing** [13394-30]

13394 0P **Multi-sensor fusion SLAM localization method based on multi-metric evaluation of visual environment degradation** [13394-34]

13394 0Q **Lightweight fire detection algorithm based on improved YOLOv8** [13394-35]

13394 0R **Research on routing planning algorithm for power business based on OSU technology** [13394-38]

13394 0S **A fault detection method based on orthogonality for integrated navigation system** [13394-41]

13394 0T **Range query with the existence of missing tags for large-scale RFID systems** [13394-45]

13394 0U **Research on system design and virtual simulation algorithm of NCG NC gear shaping preventing RCTC** [13394-46]

13394 0V **A lightweight detection method for infrared ship targets based on improved YOLOX** [13394-47]

13394 0W **Study on the influencing factors and influencing paths of photovoltaic power generation** [13394-48]

13394 0X **Comfort assessment of school chairs toward body-pressure detections based on a mechanical sensing device** [13394-49]

13394 0Y **Ultra-high concurrency device operation process data storage based on integrated policy** [13394-52]

13394 0Z **High-quality 3D reconstruction of weakly textured soft terrain based on 3D Gaussian splatting** [13394-54]

13394 10 **A dynamic obstacle culling 3D real-time map building algorithm for mobile robot localization** [13394-60]

13394 11 **Zero-shot industrial image denoising with lightweight network** [13394-62]

13394 12 **A tobacco moisture prediction approach based on VAE and PSO-BiLSTM** [13394-66]

13394 13 **Research on object detection method of infrared porcelain deteriorated insulator based on deep learning** [13394-70]

13394 14 **Research on cigarette moisture anomaly risk identification based on an improved NGBoost algorithm** [13394-80]

13394 15 **A defect detection algorithm of wind turbine blades based on an improved YOLOv8** [13394-85]

13394 16 **A 5G indoor positioning method based on Chan-White Shark optimization algorithm** [13394-86]

13394 17 **Recognition strategy for pantograph-arc based on ZOA-RBFNN** [13394-96]

13394 18 **Static strength analysis of transmission line tower under combined gravity and wind load** [13394-97]

COMPUTERS AND ARTIFICIAL INTELLIGENCE IN CONTROL

13394 19 **Temperature field analysis and structural optimization based on multi-physics-coupling** [13394-8]

13394 1A **The key points of falling weight deflectometer in the test of subgrade surface deflection and elastic modulus** [13394-21]

13394 1B **Based on 3MMO load balance strategy of UAV network under SDN** [13394-22]

13394 1C **Artificial intelligence (AI) in smart power stations: a review** [13394-29]

13394 1D **Optimization strategy and implementation of short-range wind speed testing for meteorological UAVs in complex field conditions** [13394-33]

13394 1E **Improvement of DGCNN based on point attention module and generation of hot-rolled surface inspection dataset** [13394-36]

13394 1F **Nonlinear model of current and voltage for carbon nanotube yarns** [13394-53]

13394 1G **Modeling analysis and application of moisture loss in storage bulker and tobacco cutter processes of the tobacco shreds production line** [13394-79]

13394 1H **Simulation system for wet etching of quartz beam structures based on the hull method** [13394-83]

13394 1I **Construction of quartz crystal etching rate database based on Hubbard interpolation method** [13394-84]

13394 1J **Research on the distribution map of lightning risk for transmission lines above 110kv in Qinghai region** [13394-93]

13394 1K **HybridWaveNet: a deep learning approach for significant wave height retrieval** [13394-94]

13394 1L **Applied research on single-phase grounding fault line selection based on compensation characteristics of arc suppression coil** [13394-102]

AUTOMATIC CONTROL

13394 1M **An overshoot-free high-precision multi-point hydraulic platform leveling algorithm for heavy-load AGV** [13394-4]

13394 1N **Research on motion behavior control of the carp robot based on computer vision** [13394-5]

13394 1O **Design of multi-mode power output control system for neutral beam injection system** [13394-9]

13394 1P **A fault diagnosis method of wind turbine gearbox based on CNN-ISABO-SVM** [13394-12]

13394 1Q **Adaptive tracking control of a robot with model uncertainties and position constraints** [13394-50]

13394 1R **Motion control study of omnidirectional mobile robot for substation inspection** [13394-51]

13394 1S **The enhanced inverse droop control strategy with voltage feed-forward adjustment for series input parallel output DC–DC converters** [13394-55]

13394 1T **Research and application of rational intelligent agent technology in power equipment health analysis** [13394-59]

13394 1U **Research on control strategy of active suspension based on improved RBF neural network** [13394-61]

13394 1V **Utilizing nonlinear models in power systems for short-term load forecasting** [13394-63]

13394 1W **Optimal control strategy for stability of Hammerstein backlash systems** [13394-64]

13394 1X **Integrated test system of flexible DC control and protection based on modelling and decoupling** [13394-65]

13394 1Y **Defect size evaluation in eddy current testing through wavelet transform and pseudo-color enhancement** [13394-69]

13394 1Z **Research on an automatic calibration device for near-zone field strength measuring instruments** [13394-71]

13394 20 **Research on calibration method and uncertainty evaluation of thermal gas mass flowmeter** [13394-74]

13394 21 **Application of big data algorithms in fault analysis of air supply cut tobacco feeding in cigarette production lines** [13394-75]

13394 22 **Modelling of the internal structure and mechanical properties of isolator with metal cushion as elastic damping elements** [13394-76]

13394 23 **Civil UAV command and control link safety element analysis** [13394-77]

13394 24 **Research and application of collinear conveying and buffering channels for finished cigarettes** [13394-82]

13394 25 **Micro-landscape system for automatic temperature and humidity regulation** [13394-89]

13394 26 **Research on measuring point layout and stress monitoring method of transmission tower** [13394-99]

13394 27 **Design and experimental validation of a mobile dual-purpose device for oil quantity measurement and calibration** [13394-101]

Conference Committee

Conference Chairs

David (Zhiwei) Gao, Northumbria University (United Kingdom)
Shunli Wang, Inner Mongolia University of Technology (China)

Committee Co-chairs

Ljiljana Trajkovic, Simon Fraser University (Canada)
Guangchen Liu, Inner Mongolia University of Technology (China)

Program Committee Chair

Weihua Mou, National University of Defense Technology (China)

Organizing Committee Chairs

Xueqian Fu, China Agricultural University (China)
Yongsheng Qi, Inner Mongolia University of Technology (China)
Yuanzhi Wang, Anqing Normal University (China)
Jike Zhang, Inner Mongolia University of Technology (China)
Xu Yang, Inner Mongolia University of Technology (China)

Program Committee

Duc Truong Pham, University of Birmingham (United Kingdom)
Youqing Wang, Beijing University of Chemical Technology (China)
Yuji Iwahori, Chubu University (Japan)
Hesheng Wang, Shanghai Jiaotong University (China)
Anand Nayyar, Duy Tan University (Vietnam)
Gang Wang, Beijing Institute of Technology (China)
Zhaohua Liu, Hunan University of Science and Technology (China)
Badrul Hisham Ahmad, University Teknikal Malaysia Melaka (Malaysia)
Sheng Du, China University of Geosciences (China)
Yonghong Tan, Shanghai Normal University (China)
Wenbin Gu, HoHai University (China)
P. Usha Rani, R.M.D Engineering College (India)
Ming Xie, Nanyang Technological University (Singapore)
Yilun Shang, Northumbria University (United Kingdom)
Lahoucine El Maimouni, Ibn Zohr University Morocco (Morocco)
Vandana Sharma, CHRIST University, Delhi-NCR Campus (India)

Bochun Wu, Fudan University (China)
Jiajia Jiang, Tianjin University (China)
Xiurong Zhang, China Agricultural University (China)

Session Chairs

1 Positioning Technologies and Navigation Simulation Testing
Weihua Mou, National University of Defense Technology (China)

2 SLAM and Mobile Robots
Qixin Cao, Shanghai Jiao Tong University (China)

3 New Energy and Energy Storage System Control
Bin Duan, Shandong University (China)

4 Soft Robotics: Actuation, Control, and Application
Yuan Han, Harbin Institute of Technology (China)

5 Actuators and Sensors Based on Smart Materials
Weimin Huang, Nanyang Technological University (Singapore)

6 Nonlinear Systems Modeling and Control
Yonghong Tan, Shanghai Normal University (China)

7 Machine Learning Based Fault Diagnosis and Prognosis Methods for Industrial Systems
Zhaohua Liu, Hunan University of Science and Technology (China)
