Proceedings of SPIE, 1605-7422, v. 7566

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optics in Tissue Engineering and Regenerative Medicine IV*, edited by Sean J. Kirkpatrick, Ruikang Wang, Proceedings of SPIE Vol. 7566 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

---

## SESSION 1 MULTIMODAL IMAGING IN TISSUE ENGINEERING

---

- 7566 02 **Monitoring adipose-derived stem cells within 3D carrier by combined dielectric spectroscopy and spectral domain optical coherence topography** [7566-01]  
P. O. Bagnaninchi, The Univ. of Edinburgh (United Kingdom)
- 7566 03 **Investigation of pore structure and cell distribution in EH-PEG hydrogel scaffold using optical coherence tomography and fluorescence microscopy** [7566-02]  
C.-W. Chen, M. W. Betz, J. P. Fisher, A. Paek, Univ. of Maryland, College Park (United States); J. Jiang, H. Ma, A. Cable, Thorlabs, Inc. (United States); Y. Chen, Univ. of Maryland, College Park (United States)
- 7566 04 **Combined optical coherence phase microscopy and impedance sensing measurements of differentiating adipose derived stem cells** [7566-03]  
P. O. Bagnaninchi, Univ. of Edinburgh (United Kingdom)

---

## SESSION 2 SPECTROSCOPY AND POLARIZATION

---

- 7566 06 **Development of the hyperspectral cellular imaging system to apply to regenerative medicine** [7566-05]  
M. Ishihara, National Defense Medical College (Japan); M. Sato, Tokai Univ. (Japan); K. Matsumura, National Defense Medical College (Japan); J. Mochida, Tokai Univ. (Japan); M. Kikuchi, National Defense Medical College (Japan)
- 7566 07 **Characterization of human skin cells for tissue engineering applications by Raman spectroscopy** [7566-06]  
M. Pudlas, S. Koch, Fraunhofer Institute for Interfacial Engineering and Biotechnology (Germany) and Univ. of Stuttgart (Germany); C. Bolwien, Fraunhofer Institute for Physical Measurement Techniques (Germany); H. Walles, Fraunhofer Institute for Interfacial Engineering and Biotechnology (Germany)
- 7566 09 **LCVR-based polarimetry: calibration issues** [7566-08]  
J. C. Gladish, D. D. Duncan, Oregon Health & Science Univ. (United States)
- 7566 0A **Investigation of a tissue engineered tendon model by PS-OCT** [7566-09]  
Y. Yang, M. Ahearn, I. Wimpenny, J. Guijarro-Leach, Keele Univ. (United Kingdom); J. Torbet, CREATA, CNRS (France)

---

**SESSION 3 NOVEL OPTICAL TECHNIQUES FOR TISSUE ENGINEERING**

---

- 7566 0D **Statistical characterization of engineered tissues using confocal mosaic technology** [7566-12]  
D. Levitz, A. Ardeshiri, J. Ahmed, D. S. Gareau, S. L. Jacques, Oregon Health & Science Univ. (United States)
- 7566 0E **HMC and fibroblast illuminating experiments using microdisplay** [7566-13]  
C.-J. Ou, Hsiuping Institute of Technology (Taiwan); C.-I. Shen, National Chung Hsing Univ. (Taiwan); C.-M. Ou, Kainan Univ. (Taiwan)

---

**SESSION 4 OCT FOR TISSUE ENGINEERING**

---

- 7566 0H **Optical coherence tomography investigation of growth cycles of engineered skin tissue** [7566-16]  
R. Schmitt, U. Marx, Fraunhofer-Institut für Produktionstechnologie (Germany); H. Walles, A. Heymer, Fraunhofer-Institut für Grenzflächen- und Bioverfahrenstechnik (Germany)
- 7566 0I **Using swept source optical coherence tomography to monitor wound healing in tissue engineered skin** [7566-17]  
L. E. Smith, Z. Lu, The Univ. of Sheffield (United Kingdom); M. Bonesi, The Medical Univ. of Vienna (Austria); R. Smallwood, S. J. Matcher, S. MacNeil, The Univ. of Sheffield (United Kingdom)
- 7566 0J **The study of effects of pore architecture in chitosan scaffolds on the fluid flow pattern by Doppler OCT** [7566-18]  
Y. Yang, A. Iftimia, Keele Univ. (United Kingdom); Y. Jia, Oregon Health & Science Univ. (United States); T. Gould, A. El Haj, Keele Univ. (United Kingdom); R. K. Wang, Oregon Health & Science Univ. (United States)
- 7566 0K **Understanding the nature of optical coherence tomography images using Monte Carlo modeling** [7566-19]  
A. Beaumont, M. Hu, P. H. Tomlins, National Physical Lab. (United Kingdom)
- 7566 0L **Common-path endoscopic Fourier domain OCT with a reference Michelson interferometer** [7566-20]  
R. Wang, J. Zinkovich, B. Li, Clemson Univ. (United States); X. Yuan, Nankai Univ. (China); R. Goodwin, Univ. of South Carolina (United States); R. R. Markwald, Medical Univ. of South Carolina (United States); H. Yao, B. Z. Gao, Clemson Univ. (United States)

# Conference Committee

## *Symposium Chairs*

**James G. Fujimoto**, Massachusetts Institute of Technology (United States)

**R. Rox Anderson**, Wellman Center for Photomedicine, Massachusetts General Hospital (United States), and Harvard School of Medicine (United States)

## *Program Track Chairs*

**Steven L. Jacques**, Oregon Health & Science University (United States)

**William P. Roach**, Air Force Research Laboratory (United States)

## *Conference Chairs*

**Sean J. Kirkpatrick**, Oregon Health & Science University (United States)

**Ruikang Wang**, Oregon Health & Science University (United States)

## *Program Committee*

**Stephen A. Boppart**, University of Illinois at Urbana-Champaign (United States)

**Irene Georgakoudi**, Tufts University (United States)

**Miya Ishihara**, National Defense Medical College (Japan)

**Stephen P. Morgan**, The University of Nottingham (United Kingdom)

**Ying Yang**, Keele University (United Kingdom)

## *Session Chairs*

- 1 Multimodal Imaging in Tissue Engineering  
**Sean J. Kirkpatrick**, Oregon Health & Science University (United States)
- 2 Spectroscopy and Polarization  
**Miya Ishihara**, National Defense Medical College (Japan)
- 3 Novel Optical Techniques for Tissue Engineering  
**Ying Yang, Keele University (United Kingdom)**
- 4 OCT for Tissue Engineering  
**Ruikang Wang**, Oregon Health & Science University (United States)
