

PROCEEDINGS OF SPIE

Free-Space Laser Communication and Atmospheric Propagation XXV

**Hamid Hemmati
Don M. Boroson**
Editors

**5–7 February 2013
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 8610

Proceedings of SPIE 0277-786X, V.8610

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Free-Space Laser Communication and Atmospheric Propagation XXV, edited by Hamid Hemmati,
Don M. Boroson, Proc. of SPIE Vol. 8610, 861001 · © 2013 SPIE
CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2022931

Proc. of SPIE Vol. 8610 861001-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Free-Space Laser Communication and Atmospheric Propagation XXV*, edited by Hamid Hemmati, Don M. Boroson, Proceedings of SPIE Vol. 8610 (SPIE, Bellingham, WA, 2013) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 DEMONSTRATIONS FROM AIR AND SPACE

- 8610 02 **Status of the lunar laser communication demonstration (Invited Paper)** [8610-2]
D. M. Boroson, B. S. Robinson, MIT Lincoln Lab. (United States)
- 8610 03 **Simultaneous laser ranging and communication from an Earth-based satellite laser ranging station to the Lunar Reconnaissance Orbiter in lunar orbit (Invited Paper)** [8610-3]
X. Sun, D. R. Skillman, NASA Goddard Space Flight Ctr. (United States); E. D. Hoffman, Honeywell Technology Solutions Inc. (United States); D. Mao, Sigma Space Corp. (United States); J. F. McGarry, G. A. Neumann, NASA Goddard Space Flight Ctr. (United States); L. McIntire, Catholic Univ. of America (United States); R. S. Zellar, NASA Goddard Space Flight Ctr. (United States); F. M. Davidson, The Johns Hopkins Univ. (United States); W. H. Fong, M. A. Krainak, NASA Goddard Space Flight Ctr. (United States); M. T. Zuber, Massachusetts Institute of Technology (United States); D. E. Smith, NASA Goddard Space Flight Ctr. (United States) and Massachusetts Institute of Technology (United States)
- 8610 04 **Three years coherent space to ground links: performance results and outlook for the optical ground station equipped with adaptive optics (Invited Paper)** [8610-38]
M. Gregory, D. Troendle, G. Muehlnikel, F. Heine, Tesat-Spacecom GmbH & Co. KG (Germany); R. Meyer, M. Lutzer, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany); R. Czichy, Synopta GmbH (Switzerland)

SESSION 2 LABORATORY AND PLANNED DEMONSTRATIONS

- 8610 06 **13 bits per incident photon optical communications demonstration (Invited Paper)** [8610-5]
W. H. Farr, J. M. Choi, B. Moision, Jet Propulsion Lab. (United States)
- 8610 07 **Mountain-top-to-valley optical link demonstration as part of a miniature terminal development** [8610-6]
M. Mosberger, T. Dreischer, M. Bacher, RUAG Space AG (Switzerland)
- 8610 08 **Wide field-of-view single-mode-fiber coupled laser communication terminal** [8610-7]
Y. Arimoto, National Institute of Information and Communications Technology (Japan); H. Yoshida, K. Kisara, Japan Aerospace Exploration Agency (Japan)

SESSION 3 POINTING, ACQUISITION, AND TRACKING

- 8610 09 **RIN-suppressed ultralow noise interferometric fiber optic gyroscopes (IFOGs) for improving inertial stabilization of space telescopes** [8610-10]
F. Hakimi, J. D. Moores, MIT Lincoln Lab. (United States)

- 8610 0A **Using a low-noise interferometric fiber optic gyro in a pointing, acquisition, and tracking system** [8610-11]
J. Kaufmann, F. Hakimi, D. Boroson, MIT Lincoln Lab. (United States)

SESSION 4 LASER TRANSMITTER/MODULATION

- 8610 0F **Nonlinearity mitigation of a 40-Watt 1.55-micron uplink transmitter for lunar laser communications** [8610-16]
R. T. Schulein, MIT Lincoln Lab. (United States); R. E. Lafon, NASA Goddard Space Flight Ctr. (United States); M. B. Taylor, P. A. MacKoul, J. J. Carney, M. L. Stevens, B. S. Robinson, S. Constantine, M. M. Willis, MIT Lincoln Lab. (United States); D. W. Peckham, OFS Fitel LLC (United States); B. Zhu, J. M. Fini, OFS Labs. (United States); D. O. Caplan, MIT Lincoln Lab. (United States)
- 8610 0G **Highly efficient and athermal 1550nm-fiber-MOPA-based high power down link laser transmitter for deep space communication** [8610-17]
D. Engin, F. Kimpel, J. Burton, H. Cao, B. McIntosh, M. Storm, S. Gupta, Fibertek, Inc. (United States)
- 8610 0I **Orthogonal on-off keying (O³K) for free-space laser communications** [8610-19]
S. Faruque, S. Faruque, T. N. Upal, W. Semke, The Univ. of North Dakota (United States)
- 8610 0J **The measurement and generation of orbital angular momentum using an optical geometric transformation** [8610-20]
M. P. J. Lavery, Univ. of Glasgow (United Kingdom); A. Fraine, Boston Univ. (United States); D. Roberston, Durham Univ. (United Kingdom); A. Sergienko, Boston Univ. (United States); J. Courtial, Univ. of Glasgow (United Kingdom); A. E. Wilner, The Univ. of Southern California (United States); M. J. Padgett, Univ. of Glasgow (United Kingdom)
- 8610 0K **A dual format communication modem development for the Laser Communications Relay Demonstration (LCRD) program** [8610-21]
M. A. Krainak, E. Luzhanskiy, S. X. Li, S. A. Merritt, A. W. Yu, R. Butler, J. Badgley, L. Thomas, H. Stello, A. Cheng, Q. Nguyen, S. MacPherson, NASA Goddard Space Flight Ctr. (United States)

SESSION 5 GROUND RECEIVER AND TRANSMITTER I

- 8610 0M **Comparing adaptive optics approaches for NASA LCRD Ground Station #2** [8610-23]
J. B. Stewart, D. V. Murphy, J. D. Moores, A. S. Fletcher, K. M. Bonneau, MIT Lincoln Lab. (United States)
- 8610 0N **Conceptual design of the adaptive optics system for the laser communication relay demonstration ground station at Table Mountain** [8610-24]
L. C. Roberts Jr., N. A. Page, R. S. Burruss, T. N. Truong, S. Dew, M. Troy, Jet Propulsion Lab. (United States)
- 8610 0O **The Lunar Laser OCTL Terminal (LLOT)** [8610-25]
A. Biswas, J. M. Kovalik, Jet Propulsion Lab. (United States)

SESSION 6 GROUND RECEIVER AND TRANSMITTER II

- 8610 0P **The Lunar Laser OCTL Terminal (LLOT) optical systems** [8610-26]
W. T. Roberts, M. W. Wright, Jet Propulsion Lab. (United States)
- 8610 0Q **A post-processing receiver for the lunar laser communications demonstration project**
[8610-27]
M. Srinivasan, K. Birnbaum, M. Cheng, K. Quirk, Jet Propulsion Lab. (United States)
- 8610 0R **Optical filter assembly for interplanetary optical communications** [8610-28]
Y. Chen, H. Hemmati, Jet Propulsion Lab. (United States)

SESSION 7 ATMOSPHERIC CHARACTERIZATION AND ANALYSIS

- 8610 0S **Effects of atmospheric transmission of high power diode pumped alkali lasers** [8610-30]
C. A. Rice, G. P. Perram, Air Force Institute of Technology (United States)
- 8610 0T **Measurements of partially spatially coherent laser beam intensity fluctuations propagating through a hot-air turbulence emulator and comparison with both terrestrial and maritime environments** [8610-31]
C. Nelson, U.S. Naval Academy (United States) and The Johns Hopkins Univ. (United States); S. Avramov-Zamurovic, U.S. Naval Academy (United States); O. Korotkova, Univ. of Miami (United States); R. Malek-Madani, U.S. Naval Academy (United States); R. Sova, Johns Hopkins Univ. Applied Physics Lab. (United States); F. Davidson, The Johns Hopkins Univ. (United States)
- 8610 0U **Lidar sensing of the turbulence based on the backscattering enhancement effect** [8610-32]
A. S. Gurvich, V. A. Kulikov, A.M. Obukhov Institute of Atmospheric Physics (Russian Federation)
- 8610 0W **Determining seeing conditions of a horizontal turbulent optical path with video image analysis** [8610-34]
C. C. Wilcox, U.S. Naval Research Lab. (United States); F. Santiago, Sandia National Labs. (United States); S. R. Restaino, K. P. Judd, T. Martinez, J. R. Andrews, U.S. Naval Research Lab. (United States)
- 8610 0X **Efficiency comparison of spatial and spectral diversity techniques for fading mitigation in free-space optical communications over tactical-range distances** [8610-35]
J. Minet, Univ. of Dayton (United States); M. A. Vorontsov, Univ. of Dayton (United States) and Optonicus (United States); G. Wu, Optonicus (United States); D. Dolfi, Thales Research & Technology (France)
- 8610 0Y **Digital adaptive optics and imaging through deep turbulence** [8610-36]
M. Aubailly, Univ. of Maryland, College Park (United States) and Optonicus (United States); M. A. Vorontsov, Univ. of Dayton (United States) and Optonicus (United States)

8610 0Z **Fading losses on the LCRD free-space optical link due to channel turbulence** [8610-37]
B. Moision, S. Piazzolla, J. Hamkins, Jet Propulsion Lab. (United States)

Author Index

Conference Committee

Symposium Chairs

Bo Gu, Bos Photonics (United States)
Andreas Tünnermann, Fraunhofer-Institut für Angewandte Optik und
Feinmechanik (Germany) and Friedrich-Schiller-Universität Jena
(Germany)

Symposium Cochairs

Friedhelm Dorsch, TRUMPF Werkzeugmaschinen GmbH + Company
KG (Germany)
Alberto Piqué, U.S. Naval Research Laboratory (United States)

Conference Chairs

Hamid Hemmati, Jet Propulsion Laboratory (United States)
Don M. Boroson, MIT Lincoln Laboratory (United States)

Conference Program Committee

Vincent W. S. Chan, Massachusetts Institute of Technology
(United States)
Renny A. Fields, The Aerospace Corporation (United States)
G. Charmaine Gilbreath, U.S. Naval Research Laboratory
(United States)
Olga Korotkova, University of Miami (United States)
Michael A. Krainak, NASA Goddard Space Flight Center
(United States)
Robert Lange, Tesat-Spacecom GmbH & Company KG (Germany)
Ronald L. Phillips, Florida Space Institute (United States)
Zoran Sodnik, European Space Research and Technology Center
(Netherlands)
Morio Toyoshima, National Institute of Information and
Communications Technology (Japan)
Alan Eli Willner, The University of Southern California (United States)
Shiro Yamakawa, Japan Aerospace Exploration Agency (Japan)

Session Chairs

- 1 Demonstrations from Air and Space
Hamid Hemmati, Jet Propulsion Laboratory (United States)

- 2 Laboratory and Planned Demonstrations
Don M. Boroson, MIT Lincoln Laboratory (United States)
- 3 Pointing, Acquisition, and Tracking
Don M. Boroson, MIT Lincoln Laboratory (United States)
- 4 Laser Transmitter/Modulation
Igor Zayer, European Space Operations Center (Germany)
Zoran Sodnik, European Space Research and Technology Center
(Netherlands)
- 5 Ground Receiver and Transmitter I
Keith E. Wilson, Jet Propulsion Laboratory (United States)
- 6 Ground Receiver and Transmitter II
William H. Farr, Jet Propulsion Laboratory (United States)
- 7 Atmospheric Characterization and Analysis
Don M. Boroson, MIT Lincoln Laboratory (United States)
