

PROCEEDINGS OF SPIE

Active and Passive Smart Structures and Integrated Systems 2016

Gyuhae Park
Editors

21–24 March 2016
Las Vegas, Nevada, United States

Sponsored by
SPIE

Co-sponsored by
Polytec, Inc. (United States) • OZ Optics, Ltd. (United States) • APS Dynamics, Inc. (United States) • The ElectroForce Systems Group of TA Electroforce Corporation (United States) • The Institute of Physics (United Kingdom) • American Elements (United States)

Cooperating Organizations
Intelligent Materials Forum (Japan)
Jet Propulsion Laboratory (United States)
National Science Foundation (United States)

Published by
SPIE

Part One of Two Parts

Volume 9799

Proceedings of SPIE 0277-786X, V. 9799

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Active and Passive Smart Structures and Integrated Systems 2016, edited by Gyuhae Park, Proc. of SPIE
Vol. 9799, 979901 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2241852

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Active and Passive Smart Structures and Integrated Systems 2016*, edited by Gyuhae Park, Proceedings of SPIE Vol. 9799 (SPIE, Bellingham, WA, 2016) Six-digit Article CID Number.

ISSN: 0277-786X

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/16/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY
SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Authors*
xv *Conference Committee*

Part One

SESSION 1	ENERGY HARVESTING AND SCAVENGING: BROADBAND/NONLINEAR I
9799 02	Nonlinear vibration energy harvesting based on variable double well potential function [9799-1]
9799 04	In vacuo elastodynamics of a flexible cantilever for wideband energy harvesting [9799-3]
SESSION 2	PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS I
9799 06	Parametric study of wave propagation in hierarchical auxetic perforated metamaterials [9799-6]
9799 07	3D printed elastic honeycombs with graded density for tailorable energy absorption [9799-7]
9799 08	Energy exchange and localization in a modular metastructure under impulsive excitation [9799-8]
9799 09	Vibration control via stiffness switching of magnetostrictive transducers [9799-9]
SESSION 3	STRUCTURAL HEALTH MONITORING
9799 0A	Impedance monitoring at tendon-anchorage via mountable PZT interface and temperature-effect compensation [9799-10]
9799 0B	Thermal stress characterization using the impedance-based structural health monitoring system [9799-11]
9799 0C	Piezoelectric admittance-based damage identification by Bayesian inference with pre-screening [9799-12]
9799 0E	Composite NDE using full-field pulse-echo ultrasonic propagation imaging system [9799-15]
9799 0F	Continuous fatigue crack monitoring of bridges: Long-Term Electrochemical Fatigue Sensor (LTEFS) [9799-16]

SESSION 4 PIEZO-BASED MATERIALS AND SYSTEMS I

9799 OG **An experimental study on reflector wave-front error correction using PZT actuators**
[9799-17]

SESSION 5 ENERGY HARVESTING AND SCAVENGING: BROADBAND/NONLINEAR II

9799 OI **Control between coexistent attractors for optimal performance of a bistable piezoelectric vibration energy harvester** [9799-19]

9799 OJ **Exploring the roles of standard rectifying circuits on the performance of a nonlinear piezoelectric energy harvester** [9799-20]

9799 OK **Global stabilization of high-energy resonance for a nonlinear wideband electromagnetic vibration energy harvester** [9799-22]

9799 OL **Galloping-based piezo-aeroelastic energy harvester for wireless sensors to be installed on freight trains** [9799-109]

SESSION 6 ENERGY HARVESTING AND SCAVENGING: PIEZOELECTRICS

9799 OM **Motion amplification using a flextensional compliant mechanism for enhanced energy harvesting** [9799-23]

9799 ON **Efficiency improvement of a cantilever-type energy harvester using torsional vibration** [9799-24]

9799 OO **Periodic substructure for multi-frequency energy harvesting with single piezoelectric patch** [9799-25]

9799 OP **Power conditioning for low-voltage piezoelectric stack energy harvesters** [9799-26]

9799 OQ **Two degrees of freedom piezoelectric vibration energy harvester** [9799-27]

SESSION 7 SMA-BASED MATERIALS AND SYSTEMS I

9799 OR **Relationship between input power and power density of SMA spring** [9799-28]

9799 OS **Load carrying capacity of RCC beams by replacing steel reinforcement bars with shape memory alloy bars** [9799-29]

9799 OU **Design of an electronic oscillator for resonant pressure sensor with non-collocated sensor and actuator** [9799-31]

9799 OV **Towards experimental validation of an analysis framework for morphing radiators** [9799-32]

9799 OW **Optimization of SMA layers in composite structures to enhance damping** [9799-33]

9799 0X **Use of the shape memory polymer polystyrene in the creation of thin film stretchable sensors for wearable applications [9799-34]**

SESSION 8A SMA-BASED MATERIALS AND SYSTEMS II

9799 0Y **Passive vibration damping of carbon fiber reinforced plastic with PZT particles and SMA powder [9799-35]**

9799 0Z **Investigation on low velocity impact resistance of SMA composite material [9799-36]**

SESSION 8B MODELING, OPTIMIZATION, SIGNAL PROCESSING, SENSING, CONTROL, AND DESIGN OF INTEGRATED SYSTEMS I

9799 10 **Locking mechanisms in degree-4 vertex origami structures [9799-37]**

9799 11 **Control approach development for variable recruitment artificial muscles [9799-38]**

SESSION 9A ENERGY HARVESTING AND SCAVENGING: FLUID-STRUCTURE INTERACTION

9799 12 **Toward efficient aeroelastic energy harvesting through limit cycle shaping [9799-39]**

9799 13 **Dramatic effect of fluid damping on the performance of a nonlinear M-shaped broadband energy harvester [9799-40]**

9799 14 **Aeroelastic modelling of a Piezo-solar tensioned energy harvesting ribbon [9799-41]**

9799 16 **Power source for wireless sensors in pipes [9799-43]**

SESSION 9B PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS II

9799 17 **Vibration suppression in MEMS devices using electrostatic forces [9799-44]**

9799 18 **Exact H₂ optimal tuning and experimental verification of energy-harvesting series electromagnetic tuned mass dampers [9799-45]**

9799 19 **Semi-active tuned liquid column damper implementation with real-time hybrid simulations [9799-46]**

9799 1A **Active vibration control of lightweight floor systems [9799-47]**

9799 1B **Analytical modeling of a simple passive electromagnetic eddy current friction damper [9799-48]**

SESSION 10A PIEZO-BASED MATERIALS AND SYSTEMS II

- 9799 1C **Comparison of microactuators based on piezoelectric layered plates with d_{31} and d_{33} coupling** [9799-49]
- 9799 1D **Interaction of multiple actuators for synchronized switching damping control** [9799-50]
- 9799 1E **Design and modeling of new suspension system using direct drive servo-valve system actuated by piezostack actuator** [9799-51]
- 9799 1F **Modeling and stabilization results for a charge or current-actuated active constrained layer (ACL) beam model with the electrostatic assumption** [9799-52]

SESSION 10B PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS III

- 9799 1G **Use of inerter devices for weight reduction of tuned mass-dampers for seismic protection of multi-story building: the Tuned Mass-Damper-Inerter (TMDI)** [9799-53]
- 9799 1H **Semi-active friction damper for buildings subject to seismic excitation** [9799-54]
- 9799 1I **Development of base isolation device complied with the ultimate strength design code in Japan** [9799-56]

SESSION 11A ENERGY HARVESTING AND SCAVENGING: MODELING

- 9799 1J **A dimensionless model of impact piezoelectric energy harvesting with dissipation** [9799-57]
- 9799 1K **Dynamics of energy harvesting backpack with human being interaction** [9799-58]
- 9799 1L **Optimization of vibratory energy harvesters with stochastic parametric uncertainty: a new perspective** [9799-59]
- 9799 1O **An efficient low frequency horizontal diamagnetic levitation mechanism based vibration energy harvester** [9799-62]
- 9799 1P **A multiple degree of freedom modeling approach of piezoelectret foam in a multilayer stack configuration** [9799-63]
- 9799 1Q **A comparative study on the mechatronic and electronic self-powered synchronized switch interfaces for piezoelectric energy harvesting systems** [9799-64]

Part Two

SESSION 11B PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS IV

- 9799 1S **Comparison of passive inductor designs for piezoelectric shunt damping** [9799-66]
- 9799 1U **Design of a stand-alone active damper for distributed control of vibration** [9799-68]

- 9799 1V **Optimal layout of piezo patches and control circuit parameters for vibration damping of a bounded beam using switching control** [9799-69]
- 9799 1W **Incorporating a disturbance observer with direct velocity feedback for control of human-induced vibrations** [9799-70]
- 9799 1X **State switching in regions of high modal density** [9799-71]

SESSION 12A MICRO AND NANO INTEGRATED SYSTEMS

- 9799 1Z **Energy harvesting from vertically aligned PZT nanowire arrays** [9799-73]

SESSION 12B PASSIVE AND ACTIVE VIBRATION ISOLATION SYSTEMS V

- 9799 21 **Analysis and testing of an integrated semi-active seat suspension for both longitudinal and vertical vibration control** [9799-75]
- 9799 22 **The impact of boundary conditions and fluid velocity on damping for a fluid conveying pipe in a viscous fluid** [9799-76]

SESSION 13A ENERGY HARVESTING AND SCAVENGING: GENERAL

- 9799 23 **Figure of merit comparison of PP-based electret and PVDF-based piezoelectric polymer energy harvesters** [9799-77]
- 9799 24 **Electromagnetic energy harvesting from a dual-mass pendulum oscillator** [9799-78]
- 9799 25 **Pyro-electric energy harvesting with a high Curie temperature material LiNbO_3** [9799-79]
- 9799 26 **Vibration energy harvesting with polyphase AC transducers** [9799-80]

SESSION 13B AIRCRAFT, MAV/UAV, AND MORPHING SYSTEMS

- 9799 27 **Variable buoyancy system for unmanned multi-domain vehicles** [9799-81]
- 9799 28 **High-fidelity simulation and reduced-order modelling of integrally-actuated membrane wings with feedback control** [9799-82]
- 9799 29 **Lessons learned from wind tunnel testing of a droop-nose morphing wingtip** [9799-83]
- 9799 2A **Variable stiffness sandwich panels using electrostatic interlocking core** [9799-84]

SESSION 14A ENERGY HARVESTING AND SCAVENGING: BROADBAND/NONLINEAR III

- 9799 2C **Nonlinear dynamics of magnetically coupled beams for multi-modal vibration energy harvesting** [9799-86]
- 9799 2D **Nonlinear modeling of MEMS piezoelectric energy harvesters** [9799-87]
- 9799 2E **Improved nonlinear energy harvester with matched magnetic orientation** [9799-88]
- 9799 2F **Exploiting material softening in hard PZTs for resonant bandwidth enhancement** [9799-89]

SESSION 14B MODELING, OPTIMIZATION, SIGNAL PROCESSING, SENSING, CONTROL, AND DESIGN OF INTEGRATED SYSTEMS II

- 9799 2G **Robustness of a multimodal piezoelectric damping involving the electrical analogue of a plate** [9799-90]
- 9799 2H **Input space-dependent controller for multi-hazard mitigation** [9799-91]
- 9799 2I **Acoustic prism for continuous beam steering based on piezo-electric metamaterial** [9799-92]
- 9799 2J **Model identification of terfenol-D magnetostrictive actuator for precise positioning control** [9799-93]

SESSION 15A ENERGY HARVESTING AND SCAVENGING: APPLICATIONS

- 9799 2K **Gauging the feasibility of a downhole energy harvesting system through a proof-of-concept study** [9799-95]
- 9799 2L **Energy harvesting from pavements via PVDF: hybrid piezo-pyroelectric effects** [9799-96]
- 9799 2M **A review of piezoelectric-based electrical energy harvesting methods and devices for munitions** [9799-97]
- 9799 2N **Opportunities for energy harvesting in automobile factories** [9799-98]
- 9799 2O **Smart nanogrid systems for disaster mitigation employing deployable renewable energy harvesting devices** [9799-99]
- 9799 2P **The effects of dimensional parameters on sensing and energy harvesting of an embedded PZT in a total knee replacement** [9799-100]
- 9799 2Q **Energy harvesting in pavement from passing vehicles with piezoelectric composite plate for ice melting** [9799-101]

SESSION 15B MAGNETO RHEOLOGICAL SYSTEMS

- 9799 2R **Investigation on the effect of MR elastomer based adaptive vibration absorbers on the radiated sound from circular elastic plates** [9799-102]
- 9799 2S **Design of magneto-rheological mount for a cabin of heavy equipment vehicles** [9799-103]
- 9799 2V **A new resonance based method for the measurement of magnetic field intensity** [9799-106]
- 9799 2W **Investigation of energy-efficient MRF-based clutches for hybrid powertrains** [9799-107]

POSTER SESSION

- 9799 2Y **Structural design of active seismic isolation floor with a charging function** [9799-55]
- 9799 2Z **Design principle of a nonlinear robust dynamic vibration absorber** [9799-110]
- 9799 30 **Human-simulated intelligent control of train braking response of bridge with MRB** [9799-111]
- 9799 31 **Seismic isolation device having charging function by a transducer** [9799-112]
- 9799 33 **An investigation on a semi-active magnetorheological tuned liquid column damper (MR-TLCD)** [9799-114]
- 9799 35 **Spiral Passive Electromagnetic Sensor (SPES) for composite structural changes in aircraft structures** [9799-116]
- 9799 39 **Low frequency inertial control strategy for seismic attenuation with passive monolithic mechanical sensors** [9799-120]
- 9799 3A **Active mass damper system for high-rise buildings using neural oscillator and position controller considering stroke limitation of the auxiliary mass** [9799-121]
- 9799 3C **Magneto-Thermo-Triboelectric Generator (MTTG) for thermal energy harvesting** [9799-123]
- 9799 3D **Hybrid energy harvesting using active thermal backplane** [9799-124]
- 9799 3E **Design of haptic master featuring small-sized MR brakes** [9799-125]
- 9799 3G **Using the group of non-linear cells design metamaterial bar** [9799-127]
- 9799 3H **An inverse model for magnetorheological dampers based on a restructured phenomenological model** [9799-128]
- 9799 3J **Investigation of piezoelectric impedance-based health monitoring of structure interface debonding** [9799-130]
- 9799 3K **A reconfigurable robot with tensegrity structure using nylon artificial muscle** [9799-131]

- 9799 3M **Multi-scale analysis and optimized design of laminated-MRE bearings** [9799-133]
- 9799 3O **Broadband performance of a piezoelectric energy harvester based on the internal resonance of buckled beam** [9799-135]
- 9799 3P **Energy harvesting performance of a broadband electromagnetic vibration energy harvester for powering industrial wireless sensor networks** [9799-136]
- 9799 3Q **Nondestructive evaluation of pyroshock propagation using hydrocodes** [9799-137]
- 9799 3R **Dynamic fast terminal sliding mode control of a shape memory alloy actuated system** [9799-139]
- 9799 3S **Experimental validation of a sub-surface model of solar power for distributed marine sensor systems** [9799-138]
- 9799 3T **Functionalized hexagonal boron nitride nano-coatings for protection of transparent plastics** [9799-141]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Theodore E. Matikas, University of Ioannina (Greece)

Symposium Co-Chairs

Tribikram Kundu, The University of Arizona (United States)
Gregory W. Reich, Air Force Research Laboratory (United States)

Conference Chair

Gyuhae Park, Chonnam National University (Korea, Republic of)

Conference Co-Chair

Alper Erturk, Georgia Institute of Technology (United States)

Conference Program Committee

Gregory S. Agnes, Jet Propulsion Laboratory (United States)
Mehdi Ahmadian, Virginia Polytechnic Institute and State University (United States)
Eric H. Anderson, Moog CSA Engineering (United States)
Steven R. Anton, Tennessee Technological University (United States)
Hiroshi Asanuma, Chiba University (Japan)
Amr M. Baz, University of Maryland, College Park (United States)
Diann E. Brei, University of Michigan (United States)
Gregory P. Carman, University of California, Los Angeles (United States)
Seung-Bok Choi, Inha University (Korea, Republic of)
William W. Clark, University of Pittsburgh (United States)
Alison B. Flatau, University of Maryland, College Park (United States)
Farhan S. Gandhi, Rensselaer Polytechnic Institute (United States)
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i (United States)
Victor Giurgiutiu, University of South Carolina (United States)
Faramarz Gordaninejad, University of Nevada, Reno (United States)
Nakhiah C. Goulbourne, University of Michigan (United States)
Daniel J. Guyomar, Institut National des Sciences Appliquées de Lyon (France)
Jae-Hung Han, KAIST (Korea, Republic of)
Tristram T. Hyde, NASA Headquarters (United States)
Daniel J. Inman, University of Michigan (United States)

Conor D. Johnson, Moog CSA Engineering (United States)
Hyung-Jo Jung, KAIST (Korea, Republic of)
Junrui Liang, ShanghaiTech University (China)
Wei-Hsin Liao, The Chinese University of Hong Kong
 (Hong Kong, China)
David L. Mascareñas, Los Alamos National Laboratory (United States)
Roger Ohayon, Conservatoire National des Arts et Métiers (France)
Mohammad Rastgaar Aagaah, Massachusetts Institute of Technology
 (United States)
Norbert Schwesinger, Technische Universität München (Germany)
Yi-Chung Shu, National Taiwan University (Taiwan)
Henry A. Sodano, University of Florida (United States)
Steve Southward, Virginia Polytechnic Institute and State University
 (United States)
Roger Stanway, The University of Sheffield (United Kingdom)
Jiong Tang, University of Connecticut (United States)
Dai-Hua Wang, Chongqing University (China)
Kon-Well Wang, University of Michigan (United States)
Norman M. Wereley, University of Maryland, College Park
 (United States)
Lei Zuo, Virginia Polytechnic Institute and State University
 (United States)

Session Chairs

- 1 Energy Harvesting and Scavenging: Broadband/Nonlinear I
Gyuhae Park, Chonnam National University (Korea, Republic of)
Alper Erturk, Georgia Institute of Technology (United States)
- 2 Passive and Active Vibration Isolation Systems I
Kon-Well Wang, University of Michigan (United States)
Marcelo J. Dapino, The Ohio State University (United States)
- 3 Structural Health Monitoring
Jung-Ryul Lee, KAIST (Korea, Republic of)
- 4 Piezo-based Materials and Systems I
Diann E. Brei, University of Michigan (United States)
- 5 Energy Harvesting and Scavenging: Broadband/Nonlinear II
Lihua Tang, The University of Auckland (New Zealand)
Ryan L. Harne, The Ohio State University (United States)
- 6 Energy Harvesting and Scavenging: Piezoelectrics
Hyung-Jo Jung, KAIST (Korea, Republic of)
Alessandro Cattaneo, Los Alamos National Laboratory (United States)

- 7 SMA-based Materials and Systems I
Nam Seo Goo, Konkuk University (Korea, Republic of)
Gregory N. Washington, University of California, Irvine (United States)
- 8A SMA-based Materials and Systems II
Henry A. Sodano, University of Florida (United States)
- 8B Modeling, Optimization, Signal Processing, Sensing, Control, and Design of Integrated Systems I
Nakhiah C. Goulbourne, University of Michigan (United States)
Mohammad H. Malakooti, University of Michigan (United States)
- 9A Energy Harvesting and Scavenging: Fluid-Structure Interaction
Matthew Bryant, North Carolina State University (United States)
- 9B Passive and Active Vibration Isolation Systems II
Lei Zuo, Virginia Polytechnic Institute and State University (United States)
Sondipon Adhikari, Swansea University (United Kingdom)
- 10A Piezo-based Materials and Systems II
Norbert Schwesinger, Technische Universität München (Germany)
Ozkan Ozer, University of Nevada, Reno (United States)
- 10B Passive and Active Vibration Isolation Systems III
Simon Laflamme, Iowa State University of Science and Technology (United States)
Jiong Tang, University of Connecticut (United States)
- 11A Energy Harvesting and Scavenging: Modeling
Wei-Hsin Liao, The Chinese University of Hong Kong (Hong Kong, China)
Steven R. Anton, Tennessee Technological University (United States)
- 11B Passive and Active Vibration Isolation Systems IV
Gabriele Cazzulani, Politecnico di Milano (Italy)
Jeffrey L. Kauffman, University of Central Florida (United States)
- 12A Micro and Nano Integrated Systems
Gyuhae Park, Chonnam National University (Korea, Republic of)
- 12B Passive and Active Vibration Isolation Systems V
Michael D. Todd, University of California, San Diego (United States)
- 13A Energy Harvesting and Scavenging: General
Junrui Liang, ShanghaiTech University (China)
Jeffrey T. Scruggs, University of Michigan (United States)

- 13B Aircraft, MAV/UAV, and Morphing Systems
Jae-Hung Han, KAIST (Korea, Republic of)
- 14A Energy Harvesting and Scavenging: Broadband/Nonlinear III
Gyuhae Park, Chonnam National University (Korea, Republic of)
Jinsong Leng, Harbin Institute of Technology (China)
- 14B Modeling, Optimization, Signal Processing, Sensing, Control, and Design of Integrated Systems II
Farhan S. Gandhi, Rensselaer Polytechnic Institute (United States)
Mohammad H. Malakooti, University of Michigan (United States)
- 15A Energy Harvesting and Scavenging: Applications
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i (United States)
Ya S. Wang, Stony Brook University (United States)
- 15B Magneto Rheological Systems
Seung-Bok Choi, Inha University (Korea, Republic of)
Majid Behrooz, University of Nevada, Reno (United States)
