

PROCEEDINGS OF SPIE

Organic Field-Effect Transistors XV

Iain McCulloch
Oana D. Jurchescu
Editors

29–31 August 2016
San Diego, California, United States

Sponsored by
SPIE

Cosponsored by
BASF Schweiz AG (Switzerland)
Kurt J. Lesker Company (United States)
MilliporeSigma (United States)

Published by
SPIE

Volume 9943

Proceedings of SPIE 0277-786X, V. 9943

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Organic Field-Effect Transistors XV, edited by Iain McCulloch, Oana D. Jurchescu,
Proc. of SPIE Vol. 9943, 994301 · © 2016 SPIE · CCC code: 0277-786X/16/\$18
doi: 10.1117/12.2262243

Proc. of SPIE Vol. 9943 994301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

DEVICE DESIGN

9943 OH	High performance low voltage organic field effect transistors on plastic substrate for amplifier circuits [9943-15]
---------	--

FUNDAMENTAL PROCESSES

9943 OT	Prediction of charge mobility in organic semiconductors with consideration of the grain-size effect [9943-27]
9943 OU	Thermoelectric transport properties of high mobility organic semiconductors (Invited Paper) [9943-28]

PROCESSING

9943 OX	Predicting the optimal process window for the coating of single-crystalline organic films with mobilities exceeding 7 cm²/Vs. (Organic Photonics + Electronics Best Student Paper Award) [9943-31]
---------	--

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Zakya H. Kafafi, Lehigh University (United States)

Luisa Torsi, Università degli Studi di Bari (Italy)

Conference Chairs

Iain McCulloch, King Abdullah University of Science and Technology
(Saudi Arabia)

Oana D. Jurchescu, Wake Forest University (United States)

Session Chairs

- 1 Organic and Hybrid Devices
Oana D. Jurchescu, Wake Forest University (United States)
- 2 Materials and Devices
Natalie Stingelin-Stutzmann, Imperial College London
(United Kingdom)
- 3 Materials Characterization
John E. Anthony, University of Kentucky (United States)
- 4 Device Design
Tse Nga Ng, University of California, San Diego (United States)
- 5 Chemistry
Iain McCulloch, King Abdullah University of Science and Technology
(Saudi Arabia)
- 6 Devices
Bernard Kippelen, Georgia Institute of Technology (United States)
- 7 Fundamental Processes
Michael L. Chabinyc, University of California, Santa Barbara
(United States)
- 8 Processing
Christian B. Nielsen, Queen Mary, University of London
(United Kingdom)
