SPIE

Volume 11012

Proceedings of SPIE 0277-786X, V. 11012

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Detection and Sensing of Mines, Explosive Objects, and Obscured Targets XXIV, edited by
Steven S. Bishop, Jason C. Isaacs, Proc. of SPIE Vol. 11012, 1101201 · © 2019 SPIE
CCC code: 0277-786X/19/$18 · doi: 10.1117/12.2536812

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 APPLIED MACHINE LEARNING

11012 02 **Machine learning based automatic target recognition algorithm applicable to ground penetrating radar data (Invited Paper)** [11012-1]

11012 05 **Deep convolutional neural network target classification for underwater synthetic aperture sonar imagery** [11012-5]

11012 06 **Reliable training of convolutional neural networks for GPR-based buried threat detection using the Adam optimizer and batch normalization** [11012-6]

SESSION 2 APPLIED FEATURE EXTRACTION I

11012 07 **Identification of buried objects based on peak scatter modelling of GPR A-scan signals** [11012-7]

11012 08 **Comparing target information in voxel and pixel ultra-wideband radar images** [11012-8]

11012 09 **On the use of multiresolution analysis for subsurface object detection using deep ground penetrating radar** [11012-9]

11012 0A **Evaluation of image features for discriminating targets from false positives in synthetic aperture sonar imagery** [11012-10]

SESSION 3 APPLIED FEATURE EXTRACTION II

11012 0B **Feature extraction for predicting the probability of detecting buried explosive objects using GPR data** [11012-11]

11012 0C **A comparative analysis of the SVM and K-NN to detect buried explosive objects using edge histogram features from GPR data** [11012-12]

11012 0F **An exploration of gradient-based features for buried threat detection using a handheld ground penetrating radar** [11012-15]

SESSION 4 APPLIED FEATURE EXTRACTION III

11012 0G **How transferable are downward-looking and handheld ground penetrating radar data? Experiments in the context of buried threat detection** [11012-16]

SESSION 5 HYDROGEOLOGICAL EFFECTS

11012 0I **Analysis of the effect of salt water on time domain electromagnetic induction sensing of submerged metallic objects** [11012-18]

11012 0J **Hydro-electromagnetic properties in ground-penetrating radar field target detection studies** [11012-19]

SESSION 6 UAS APPLICATIONS

11012 0K **Buried object imaging using a small UAS-based GPR** [11012-20]

11012 0N **Investigation of initialization strategies for the Multiple Instance Adaptive Cosine Estimator** [11012-3]

SESSION 7 CLASSIFICATION SCHEMES I

11012 0O **A portable discrete frequency NQR explosives detection system** [11012-23]

11012 0P **Multi-phase performance evaluation for modern minehunting systems** [11012-24]

11012 0Q **High-frequency electromagnetic induction (HFEMI) data from carbon rods, wires, and improvised explosive device constituent parts** [11012-25]

11012 0R **Classification using low-rank features from an electromagnetic induction sensor** [11012-26]

11012 0T **Comparison of possibilistic fuzzy local information C-means and possibilistic K-nearest neighbors for synthetic aperture sonar image segmentation** [11012-28]

SESSION 8 CLASSIFICATION SCHEMES II

11012 0U **Comparison of hand-held WEMI target detection algorithms** [11012-29]

11012 0V **Scalable high-resolution algorithms for landmine imaging problem** [11012-30]

11012 0W **Doppler-vibrometer landmine-detection system operated from a moving vehicle** [11012-31]

11012 0X **Investigating time domain EMI signals diffusion in a conducting environment for UXO detection and classification** [11012-32]

SESSION 9 SENSING MELANGE I

11012 0Y **Transfer and multitask learning using convolutional neural networks for buried wire detection from ground penetrating radar data** [11012-46]

11012 0Z **Combined use of remote sensing data and geographic information system techniques for detecting underground structures for defense and security applications in Cyprus** [11012-37]

11012 10 **Counter-mine augmented reality training system (CMARTS)** [11012-38]

11012 11 **Dual-band discrimination and imaging of plastic objects** [11012-39]

11012 12 **New possibilities of post-blast residues analysis in forensic science** [11012-40]

11012 13 **In-vehicle illumination-invariant change detection based on intrinsic images and differences of Gaussians** [11012-41]

SESSION 10 SENSING MELANGE II

11012 14 **Enhanced metal detection using Halbach arrays** [11012-42]

11012 15 **Path reconstruction from nontraditional sensor information using subgraph isomorphism algorithms** [11012-36]

SESSION 11 SENSING MELANGE III

11012 16 **Dual sensor ALIS evaluation test in Cambodia** [11012-33]

11012 17 **Quadratic lifting inversion applied to buried object radar imaging** [11012-34]

11012 18 **Exploiting polarization of very low frequency scattered fields to localize objects** [11012-35]

POSTER SESSION

11012 19 **Multiparametric full waveform inversion of 2D ground penetrating radar data using multiple GPUs** [11012-43]

11012 1A **Detection of the buried landmine/projectile using LS-band FLGPR vehicle** [11012-44]

11012 1C **Orbital angular momentum assisted ground penetrating radar** [11012-47]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)
Ruth Moser, Air Force Research Laboratory (United States)

Symposium Co-chair

John Pellegrino, Electro-Optical Systems Laboratory, Georgia Institute of Technology (United States)

Conference Chairs

Steven S. Bishop, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Jason C. Isaacs, Naval Surface Warfare Center Panama City Divison (United States)

Conference Program Committee

Canicious G. Abeynayake, Defence Science and Technology Group (Australia)
Derek T. Anderson, Mississippi State University (United States)
Benjamin E. Barrowes, U.S. Army Engineer Research and Development Center (United States)
Leslie M. Collins, Duke University (United States)
Anthony A. Faust, Defence Research and Development Canada, Suffield (Canada)
Tesfaye G-Michael, Naval Surface Warfare Center Panama City Divison (United States)
Pete Howard, U.S. Army CERDEC NVESD (United States)
James M. Keller, University of Missouri-Columbia (United States)
Aaron LaPointe, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Henric Östmark, Swedish Defence Research Agency (Sweden)
Motoyuki Sato, Tohoku University (Japan)
Waymond R. Scott Jr., Georgia Institute of Technology (United States)
Alina Zare, University of Florida (United States)

Session Chairs

1 Applied Machine Learning
Ken E. Yasuda, U.S. Army RDECOM CERDEC NVESD (United States))

2 Applied Feature Extraction I
Ken E. Yasuda, U.S. Army RDECOM CERDEC NVESD (United States)
Mihail Popescu, University of Missouri (United States)

3 Applied Feature Extraction II
Bradley W. Libbey, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Canicious G. Abeynayake, Defence Science and Technology Group (Australia)

4 Applied Feature Extraction III
Tesfaye G-Michael, Naval Surface Warfare Center Panama City Divison (United States)

5 Hydrogeological Effects
Bradley W. Libbey, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Michael Scholl, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

6 UAS Applications
Peter D. Howard, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Alina Zare, University of Florida (United States)

7 Classification Schemes I
Jason C. Isaacs, Naval Surface Warfare Center Panama City Div. (United States)
Anthony A. Faust, Defence Research and Development Canada, Suffield (Canada)

8 Classification Schemes II
Aaron LaPointe, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Waymond R. Scott Jr., Georgia Institute of Technology (United States)

9 Sensing Melange I
Steven S. Bishop, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Derek Anderson, University of Missouri (United States)

10 Sensing Melange II
Sanjeev Agarwal, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Motoyuki Sato, Tohoku University (Japan)

11 Sensing Melange III
Sanjeev Agarwal, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Benjamin E. Barrowes, U.S. Army Engineer Research and Development Center (United States)
