

PROCEEDINGS OF SPIE

***First International Conference on  
Spatial Atmospheric Marine  
Environmental Optics (SAME 2023)***

**Weibiao Chen  
Dengxin Hua  
Yongchao Zheng**  
*Editors*

**7–9 April 2023  
Shanghai, China**

*Organized by*  
Chinese Society for Optical Engineering (CSOE) (China)

*Technical Sponsor and Published by*  
SPIE

**Volume 12706**

Proceedings of SPIE 0277-786X, V. 12706

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

First International Conference on Spatial Atmospheric Marine Environmental Optics (SAME 2023),  
edited by Weibiao Chen, Dengxin Hua, Yongchao Zheng, Proc. of SPIE Vol. 12706,  
1270601 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.2686075

Proc. of SPIE Vol. 12706 1270601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *First International Conference on Spatial Atmospheric Marine Environmental Optics (SAME 2023)*, edited by Weibiao Chen, Dengxin Hua, Yongchao Zheng, Proc. of SPIE 12706, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## FIRST INTERNATIONAL CONFERENCE ON SPATIAL ATMOSPHERIC MARINE ENVIRONMENTAL OPTICS (SAME2023)

---

- 12706 02 **Measurement and study of daytime optical turbulence and precipitable water vapor in the northwestern area of China** [12706-4]
- 12706 03 **Methane leakage monitoring system based on light-induced thermoelastic spectroscopy** [12706-6]
- 12706 04 **Varifocal lens based on fifth-order XY polynomial freeform surface** [12706-7]
- 12706 05 **Remote sensing of H<sub>2</sub>O and HDO column based on Fourier transform infrared spectroscopy** [12706-8]
- 12706 06 **Air microfluidic chip design for atmospheric particulate matter detection** [12706-9]
- 12706 07 **Research on atmospheric turbulence-degraded image restoration based on generative adversarial networks** [12706-10]
- 12706 08 **Analysis and correction of environmental differences in geometric performance of spaceborne optical instruments** [12706-13]
- 12706 09 **Simulation and analysis of thermal characteristics of stratospheric airship** [12706-14]
- 12706 0A **Prediction of aerosol extinction coefficient in coastal areas of South China based on informer-LSTF** [12706-15]
- 12706 0B **Fast detection method of calibrator spaceborne sun glint based on FPGA** [12706-16]
- 12706 0C **Quantitative analysis of Cr in soil using laser induced breakdown spectroscopy combined with relevance vector machine method** [12706-17]
- 12706 0D **Optical wireless communication-based 2K real-time video surveillance system for future underwater visual monitoring** [12706-19]
- 12706 0E **Antenna efficiency and aperture optimization analysis of spaceborne coherent wind lidar** [12706-21]
- 12706 0F **Analysis of propagation characteristics of combined laser in turbulent atmosphere** [12706-22]
- 12706 0G **Research on the autonomous avoidance technology of satellite applicable to the low-orbit giant constellations** [12706-23]

- 12706 OH **A method for predicting aerosol optical thickness based on kernel principal component analysis using geographically and temporally weighted regression model** [12706-27]
- 12706 OI **The mechanism study of highly sensitive gas sensing based on double-layer graphene plasmons** [12706-29]
- 12706 OJ **Optical design of off-axis three-mirror reflective system by neural networks** [12706-30]
- 12706 OK **Coherence analysis of laser pulses based on an external cavity circulation** [12706-34]
- 12706 OL **Scintillation index based on modified Bessel beam in ocean turbulence** [12706-35]
- 12706 OM **Forward model for O<sub>2</sub> A-band night glow limb radiance in the mesosphere and lower thermosphere** [12706-36]
- 12706 ON **CO<sub>2</sub> retrieval method based on GaoFen-5 satellite data** [12706-39]
- 12706 OO **Low-noise Si transferring detector for correlated photon absolute source** [12706-40]
- 12706 OP **Analysis of the optimal detection spectrum of air targets based on MODIS data** [12706-41]
- 12706 OQ **MERRA-2 AOD product performance in Eastern and Southern China Sea** [12706-42]
- 12706 OR **Precipitation estimation by infrared brightness temperature measurement of FengYun-4A imager** [12706-45]
- 12706 OS **Chlorophyll-a concentration inversion and distribution with GOCI images in the Changjiang Estuary** [12706-49]
- 12706 OT **The research progress in underwater wireless optical communication technology** [12706-50]
- 12706 OU **Prediction of aerosol scattering and absorption coefficients based on machine learning** [12706-51]
- 12706 OV **Design of a temperature compensation birefringent filter based on thermo-optic effect for space solar exploration** [12706-52]
- 12706 OW **Simulation of power-modulation mid-infrared integrated-path differential absorption lidar for probing benzene concentration** [12706-54]
- 12706 OX **Stray light simulation and suppression of high-resolution simultaneous polarization imager** [12706-55]
- 12706 OY **Restoration of rotating Fourier transform ultraviolet Raman spectrum with a time sequences trigger method** [12706-57]
- 12706 OZ **Detection of sensible heat flux in atmospheric turbulence by laser speckle imaging based on a cooperative target** [12706-59]

- 12706 10 **Time of flight LIDAR ranging and error analysis under smog conditions** [12706-60]
- 12706 11 **The method of retrieving aerosol extinction coefficient by ultraviolet lidar** [12706-63]
- 12706 12 **Performance analysis of moving average filtering used in TDLAS carbon dioxide sensing system**  
[12706-64]
- 12706 13 **Correlation analysis on light scattering intensity distribution and mass concentration of atmospheric particles in different polarization states** [12706-65]
- 12706 14 **Underwater stratified model based on ARGO data and laser transmission characteristics**  
[12706-66]
- 12706 15 **Polarization sensitivity calibration of the non-polarization channel of polarization multiangle imager onboard Fengyun satellite** [12706-68]
- 12706 16 **Performance analysis of plenoptic wavefront sensor** [12706-72]

# Conference Committee

## *Conference Chairs*

**Weibiao Chen**, Shanghai Institute of Optics and Fine Mechanics  
(China)

**Dengxin Hua**, Xi'an University of Technology (China)

**Yongchao Zheng**, China Academy of Space Technology (China)

## *Technical Committee Members*

**Jianguo Liu**, Anhui Institute of Optics and Fine Mechanics, CAS  
(China)

**Wei Gong**, Wuhan University (China)

**Zhongping Li**, Xiamen University (China)

**Pinhua Xie**, Anhui Institute of Optics and Fine Mechanics, CAS  
(China)
