Volume 7165

Proceedings of SPIE, 1605-7422, v. 7165

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Mechanisms for Low-Light Therapy IV*, edited by Michael R. Hamblin, Ronald W. Waynant, Juanita Anders, Proceedings of SPIE Vol. 7165 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height from left to right, with a curved line above them.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1

- 7165 02 **Role of reactive oxygen species in low-level light therapy (Invited Paper)** [7165-01]
A. C.-H. Chen, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Boston Univ. School of Medicine (United States); Y.-Y. Huang, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Harvard Medical School (United States); P. R. Arany, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Dental Medicine (United States); M. R. Hamblin, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States), Harvard School of Dental Medicine (United States), and Harvard-MIT Division of Health Sciences and Technology (United States)
- 7165 03 **Near-infrared light as a possible treatment option for Parkinson's disease and laser eye injury (Invited Paper)** [7165-02]
K. DeSmet, Univ. of Wisconsin, Milwaukee (United States); E. Buchmann, M. Henry, M. Wong-Riley, Medical College of Wisconsin (United States); J. Eells, Univ. of Wisconsin, Milwaukee (United States); J. VerHoeve, Univ. of Wisconsin, Madison (United States); H. Whelan, Medical College of Wisconsin (United States)
- 7165 04 **Amplification of effects of photons on wound healing (Invited Paper)** [7165-03]
M. Dyson, King's College London (United Kingdom)

SESSION 2

- 7165 07 **The importance of coherence in phototherapy** [7165-06]
T. Hode, Irradia USA (United States); D. Duncan, S. Kirkpatrick, Oregon Health & Science Univ. (United States); P. Jenkins, Irradia USA (United States); L. Hode, Swedish Laser-Medical Society (Sweden)
- 7165 08 **A comparative study on non-confluent and confluent human malignant brain cancer metabolic response to He-Ne laser exposures: evidence for laser-enhanced cellular production of H₂O₂ and laser induced bystander effect** [7165-07]
D. B. Tata, R. W. Waynant, U.S. Food and Drug Administration (United States)
- 7165 09 **The effect of 648-nm diode laser irradiation on second messengers in senescent human keratinocytes** [7165-08]
D. Hawkins Evans, H. Abrahamse, Univ. of Johannesburg (South Africa)
- 7165 0A **Effects of a polarized light source (λ 400-2000nm) on H.Ep.2 and L929 cell lines: a spectroscopic in vitro study** [7165-09]
J. S. D. C. Monteiro, Federal Univ. of Bahia (Brazil); K. V. M. de Moura, C. B. Lopes, C. P. Soares, Univ. do Vale do Paraíba (Brazil); A. L. Barbosa Pinheiro, Univ. do Vale do Paraíba (Brazil) and Federal Univ. of Bahia (Brazil)

SESSION 3

- 7165 0B **Low-level laser therapy activates NF-kB via generation of reactive oxygen species in mouse embryonic fibroblasts** [7165-10]
A. C.-H. Chen, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Boston Univ. School of Medicine (United States); P. R. Arany, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Dental Medicine (United States); Y.-Y. Huang, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Harvard Medical School (United States); E. M. Tomkinson, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Smith College (United States); T. Saleem, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States) and Aga Khan Medical School (Pakistan); F. E. Yull, T. S. Blackwell, Vanderbilt Univ. School of Medicine (United States); M. R. Hamblin, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States), Harvard Medical School (United States), and Harvard-MIT Division of Health Sciences and Technology (United States)
- 7165 0C **Role of ROS-mediated TGF beta activation in laser photobiomodulation** [7165-11]
P. R. Arany, Harvard Univ. (United States), Harvard School of Dental Medicine and Brigham and Women's Hospital (United States), Harvard School of Engineering and Applied Sciences (United States), and Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States); A. C.-H. Chen, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States); T. Hunt, D. J. Mooney, Harvard School of Engineering and Applied Sciences (United States); M. Hamblin, Wellman Ctr. for Photomedicine, Massachusetts General Hospital (United States)
- 7165 0D **Effects of visible or IR laser light on the progression of chemo-induced oral dysplasia: in vivo study on the hamster cheek pouch model** [7165-12]
J. S. D. C. Monteiro, G. T. Aciole, M. C. T. Cangussu, J. N. D. Santos, A. L. Barbosa Pinheiro, Federal Univ. of Bahia (Brazil)
- 7165 0E **DNA damage in wounded, hypoxic, and acidotic human skin fibroblast cell cultures after low-energy laser irradiation** [7165-13]
D. Hawkins Evans, A. Mbene, I. Zungu, N. Houreld, H. Abrahamse, Univ. of Johannesburg (South Africa)

SESSION 4

- 7165 0H **Photodynamic therapy can kill *Cryptococcus neoformans* in in vitro and in vivo models** [7165-17]
R. A. Prates, IPEN-CNEN/SP (Brazil); E. G. da Silva, ICB/USP (Brazil); P. F. Chaves, A. J. S. Santos, IPEN-CNEN/SP (Brazil); C. R. Paula, ICB/USP (Brazil); M. S. Ribeiro, IPEN-CNEN/SP (Brazil)
- 7165 0I **Low-intensity LED (625 and 405 nm) and laser (805 nm) killing of *Propionibacterium acnes* and *Staphylococcus epidermidis*** [7165-18]
E. S. Tuchina, V. V. Tuchin, Saratov State Univ. (Russian Federation)

7165 0J

Preventive and therapeutic effects of low level laser irradiation on gentamicin vestibulotoxicity in rat utricle [7165-19]

C.-K. Rhee, Y. H. Oh, J.-C. Ahn, M.-S. Jung, Y.-S. Kim, M.-W. Suh, Dankook Univ. College of Medicine (Korea, Republic of)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States) and Harvard Medical School
(United States)

Program Track Chair

Reza S. Malek, Mayo Clinic (United States)

Conference Chairs

Michael R. Hamblin, Massachusetts General Hospital (United States)

Ronald W. Waynant, U.S. Food and Drug Administration (United States)

Juanita Anders, Uniformed Services University of the Health Sciences
(United States)

Program Committee

James D. Carroll, THOR Photomedicine Ltd. (United Kingdom)

Luis H. De Taboada, PhotoThera, Inc. (United States)

Mary Dyson, Dyderm Ltd. (United Kingdom)

Tomas L. M. Hode, Irradia USA (United States)

Session Chairs

- 1 **Michael R. Hamblin**, Massachusetts General Hospital (United States)
- 2 **Juanita Anders**, Uniformed Services University of the Health Sciences
(United States)
- 3 **Ronald W. Waynant**, U.S. Food and Drug Administration (United States)
- 4 **James D. Carroll**, THOR Photomedicine Ltd. (United Kingdom)
