SPIE

Volume 7611

Proceedings of SPIE, 0277-786X, v. 7611

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:
Author(s), "Title of Paper," in *Advances in Photonics of Quantum Computing, Memory, and Communication III*, edited by Zameer U. Hasan, Alan E. Craig, Philip R. Hemmer, Charles M. Santori, Proceedings of SPIE Vol. 7611 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

QUANTUM COMPUTATION WITH IONS AND SOLID-STATE IMPURITIES I

7611 05 **Intrinsic properties of the NV center in diamond (Invited Paper)** [7611-04]
N. B. Manson, L. J. Rogers, R. L. McMurtrie, The Australian National Univ. (Australia); M. W. Doherty, The Univ. of Melbourne (Australia); A. Batalov, V. Jacques, Univ. Stuttgart (Germany)

QUANTUM COMPUTATION WITH IONS AND SOLID-STATE IMPURITIES II

7611 08 **Observation of the dynamic Jahn-Teller effect in the excited states of nitrogen-vacancy centers in diamond** [7611-07]
K.-M. C. Fu, C. Santori, P. E. Barclay, Hewlett-Packard Labs. (United States); L. J. Rogers, N. B. Manson, Australian National Univ. (Australia); R. G. Beausoleil, Hewlett-Packard Labs. (United States)

TAILORING QUANTUM STATES FOR COMPUTING

7611 0H **Maximum coherence in optical transitions in rare-earth-ion-activated solids (Invited Paper)** [7611-17]
A. K. Rebane, Montana State Univ. (United States) and National Institute of Chemical Physics and Biophysics (Estonia); C. W. Thiel, R. K. Mohan, R. L. Cone, Montana State Univ. (United States)

INTEGRATED QUANTUM INFORMATION PROCESSING IN SEMICONDUCTORS I

7611 0I **Fast optically driven spin qubit gates in an InAs quantum dot (Invited Paper)** [7611-20]
E. D. Kim, K. Truex, X. Xu, B. Sun, D. G. Steel, Univ. of Michigan (United States); A. S. Bracker, D. Gammon, Naval Research Lab. (United States); L. Sham, Univ. of California, San Diego (United States)

7611 0J **Spin echo of electron spins in semiconductors using ultrafast, small-angle, optical pulses (Invited Paper)** [7611-21]
S. M. Clark, Stanford Univ. (United States); K.-M. C. Fu, Hewlett-Packard Labs (United States); Q. Zhang, Stanford Univ. (United States) and National Institute of Informatics (Japan); T. D. Ladd, HRL Labs., LLC (United States); C. Stanley, Univ. of Glasgow (United Kingdom); Y. Yamamoto, Stanford Univ. (United States) and National Institute of Informatics (Japan)

7611 0K **Experimental approach to ultrafast optical spin echo of a single quantum dot electron spin** [7611-22]
K. De Greve, D. Press, Stanford Univ. (United States); T. D. Ladd, Stanford Univ. (United States) and National Institute of Informatics (Japan); B. Friess, Stanford Univ. (United States) and Univ. Würzburg (Germany); P. L. McMahon, Stanford Univ. (United States); C. Schneider, M. Kamp, S. Hoefling, A. Forchel, Univ. Würzburg (Germany); Y. Yamamoto, Stanford Univ. (United States) and National Institute of Informatics (Japan)

7611 0L **Optical manipulation of quantum dot excitons strongly coupled to photonic crystal cavities (Invited Paper)** [7611-23]
A. Majumdar, Stanford Univ. (United States); A. Faraon, Hewlett Packard Labs. (United States); D. Englund, Columbia Univ. (United States); N. Manquest, Stanford Univ. (United States); H. Kim, P. Petroff, Univ. of California, Santa Barbara (United States); J. Vučković, Stanford Univ. (United States)

INTEGRATED QUANTUM INFORMATION PROCESSING IN SEMICONDUCTORS II

7611 0O **Coherently controlled quantum emitters in cavities (Invited Paper)** [7611-26]
A. Muller, E. B. Flagg, The Univ. of Texas at Austin (United States); D. G. Deppe, CREOL, Univ. of Central Florida (United States); G. J. Salamo, Univ. of Arkansas (United States); C. K. Shih, The Univ. of Texas at Austin (United States)

7611 0P **Integrated photonic crystal networks with coupled quantum dots** [7611-27]
A. Faraon, A. Majumdar, D. Englund, Z. Lin, J. Vučković, Stanford Univ. (United States)

7611 0Q **Optimal pulse to generate non-classical photon states via photon blockade** [7611-28]
A. Majumdar, A. Faraon, J. Vučković, Stanford Univ. (United States)

QUANTUM IMAGING AND METROLOGY

7611 0S **Quantum Cramer-Rao bound and parity measurement (Invited Paper)** [7611-30]
A. Chiruvelli, H. Lee, Louisiana State Univ. (United States)

Author Index

Conference Committee

Symposium Chair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Symposium Cochairs

Liang-Chy Chien, Kent State University (United States)
James G. Grote, Air Force Research Laboratory (United States)

Program Track Chair

Zameer U. Hasan, Temple University (United States)

Conference Chairs

Zameer U. Hasan, Temple University (United States)
Alan E. Craig, Montana State University (United States)
Philip R. Hemmer, Texas A&M University (United States)
Charles M. Santori, Hewlett-Packard Laboratories (United States)

Program Committee

Dmitry Budker, University of California, Berkeley (United States)
Jonathan P. Dowling, Louisiana State University (United States)
Gurudev Dutt, University of Pittsburgh (United States)
James D. Franson, University of Maryland, Baltimore County (United States)
David H. Hughes, Air Force Research Laboratory (United States)
Fedor Jelezko, Universität Stuttgart (Germany)
Hwang Lee, Louisiana State University (United States)
Seth Lloyd, Massachusetts Institute of Technology (United States)
Aleksander K. Rebane II, Montana State University, Bozeman (United States)
Selim M. Shahriar, Northwestern University (United States)
Alan E. Willner, University of Southern California (United States)
Joerg Wrachtrup, Universität Stuttgart (Germany)
Horace P. Yuen, Northwestern University (United States)
M. Suhail Zubairy, Texas A&M University (United States)

Session Chairs

1 Quantum Computation with Ions and Solid-State Impurities I
Charles M. Santori, Hewlett-Packard Laboratories (United States)

2 Quantum Computation with Ions and Solid-State Impurities II
Hwang Lee, Louisiana State University (United States)

3 Quantum Communication
Zameer U. Hasan, Temple University (United States)

4 Tailoring Quantum States for Computing
Andrei Faraon, Hewlett-Packard Laboratories (United States)

5 Integrated Quantum Information Processing in Semiconductors I
Philip R. Hemmer, Texas A&M University (United States)

6 Integrated Quantum Information Processing in Semiconductors II
Philip R. Hemmer, Texas A&M University (United States)

7 Quantum Imaging and Metrology
Jonathan P. Dowling, Louisiana State University (United States)
